Introductory Section

January 15, 2021

The Honorable Douglas A. Ducey
Governor of the State of Arizona,
Members of the Legislature, and
Citizens of the State of Arizona

The Arizona Department of Transportation (Department) is pleased to submit the Comprehensive Annual Financial Report (CAFR) of the Department for the fiscal year ended June 30, 2020. The CAFR is presented in three sections: Introductory, Financial, and Statistical. The **Introductory Section** includes this Letter of Transmittal, a List of Principal Officials, and the Department’s Organization Chart. The **Financial Section** includes the Independent Auditors’ Report, Management’s Discussion and Analysis, Basic Financial Statements, Notes to the Financial Statements, Required Supplementary Information, as well as Other Supplementary Information. The **Statistical Section** includes additional financial information and transportation data presented on a multi-year comparative basis.

Arizona Revised Statutes, §41-1279.03, requires the State Auditor General to “conduct or cause to be conducted at least biennial financial and compliance audits of financial transactions and accounts kept by or for all state agencies subject to the single audit act of 1984 (P.L. 98-502).” In fulfillment of this requirement, the Department prepared this CAFR, for the fiscal year ended June 30, 2020, and contracted with the independent auditing firm of CliftonLarsonAllen LLP to audit the financial statements.

The objective of the independent audit is to provide a reasonable assurance that the financial statements are free from material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements; assessing the accounting principles used and significant estimates made by management; and evaluating the overall financial statement presentation. The independent auditor concluded, based upon the audit, that there was a reasonable basis for rendering an unmodified opinion that the Department’s financial statements for the fiscal year ended June 30, 2020, are fairly presented in conformity with accounting principles generally accepted in the United States of America (GAAP). The independent auditors’ report is presented as the first component of the Financial Section of this report.

GAAP requires that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management’s Discussion and Analysis (MD&A). This Letter of Transmittal is designed to complement the MD&A and should be read in conjunction with it. The Department’s MD&A can be found immediately following the report of the independent auditors.

The CAFR includes all funds (some of which are external to the Department) used to record the financial activity of the Department. Responsibility for both the accuracy of the data and the completeness and fairness of the presentation, including all disclosures, rests with the Department.

To provide a reasonable basis for making these representations, the Department has established a comprehensive internal control framework that is designed both to protect the Department’s assets from loss, theft, or misuse and to compile sufficiently reliable information for the preparation of the financial statements in conformity with GAAP. The Department’s internal control includes both automated controls, which are an integral component of the financial accounting system, and comprehensive policies and procedures. In addition, the Department’s Office of Audit and Analysis is an independent unit that reviews accounting controls and performs operational audits of the various divisions and units of the Department. Because the cost of internal controls should not outweigh their benefits, the

Department's comprehensive framework of internal control has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatements.

To the best of our knowledge and belief, this financial report is complete and reliable in all material respects and is reported in a manner designed to present fairly the financial position and results of operations of the various funds. All disclosures necessary to enable the reader to gain an understanding of the Department's financial activities have been included.

Profile of the Department

The Department was established by the state legislature in July 1974 by combining the former Arizona Highway Department (originally established in 1927) and the Department of Aeronautics (originally established in 1962). The Department is not legally separate from the State of Arizona's primary government. The Department's mission is to provide a safe, efficient, cost-effective transportation system. The vision is creating a transportation system for Arizona that improves the quality of life. The Department's statutory authority for carrying out its programs is found in Arizona Revised Statutes, Titles 28, 35, and 41.

The Department receives guidance in capital planning and program development from a seven-member Transportation Board of the State of Arizona Department of Transportation (Transportation Board) appointed by the governor and confirmed by the state senate. The Transportation Board is responsible for the annual update of the Five-Year Transportation Facilities Construction Program and awards contracts each month for highway projects. The Transportation Board also has authority for the issuance of highway revenue and transportation excise tax bonds, grant anticipation notes (GARVEE bonds), and board funding obligations.

As of June 30, 2020, the Department was organized into six major operating divisions supported by several groups, such as Human Resources, Information Technology and Financial Management Services. The six major operating divisions include: Infrastructure Delivery and Operations (IDO), Motor Vehicle Division (MVD), Enforcement and Compliance Division (ECD), Administrative Services Division (ASD), Multimodal Planning Division (MPD) and Transportation System Management and Operations (TSMO).

- The IDO is responsible for the management and maintenance of the existing state highway system and related facilities as well as the location, design, and construction of new highways and facilities that are a part of the state highway system. The goals of the IDO are to enhance the safe movement of people and products throughout Arizona, optimize efficiencies and effectiveness of the transportation system, develop and retain a high performing workforce, and promote environmental sustainability and stewardship.
- The MVD regulates motor vehicles in the state and collects motor vehicle registration fees, motor carrier fees, motor vehicle operators' license fees, and miscellaneous fees and revenues. The MVD annually processes motor vehicle registrations and records, issues certificates of title for motor vehicles, and processes drivers' license applications.
- The ECD conducts criminal and administrative investigations related to all facets of agency operations, e.g., titling, registration, and licensing; as well as providing services to the local and national law enforcement communities while enforcing transportation related laws and regulations.
- The ASD provides a wide variety of services for the Department business areas and employees. The ASD work units include Equipment Services, Facilities Maintenance & Support, and Procurement, Safety & Health. The ASD also oversees operations of the Grand Canyon National Park Airport.
- The MPD is responsible for the planning of the statewide transportation system, including highways and airports, in coordination with local and regional planning agencies. The MPD produces the Five-Year Transportation Facilities Construction Program through which the Transportation Board establishes the priorities for highways and airports. The MPD also supports statewide public transit planning, administers federal grants for transit planning in rural and metropolitan areas, and performs state regulatory safety oversight for the light rail system in Maricopa County.

- The TSMO is responsible for optimizing performance of existing infrastructure by implementing multimodal, intermodal, and cross-jurisdictional systems, services, and projects. The TSMO strategies improve system efficiency, enhance public safety and security, reduce traffic delays, and improve access to information to travelers. The TSMO responsibilities include traffic safety, incident management, travel information, roadway weather, freeway management, connected and automated vehicles, traffic signal systems, work zone, managed lanes, emergency response, Homeland Security, freight, and active traffic management.

Overall, the Department employs approximately 3,600 persons.

Budgetary Controls Upon the effective date of the operating budget appropriations bill, allocations are made to organizational levels within each division. The allocations result in a detailed operating budget that guides the divisions and programs in their financial operation. State funding for the Five-Year Transportation Facilities Construction Program is included in the capital outlay appropriations bill as a lump-sum budget without identifying individual projects. In the land, building, and improvements portion of that bill, each separate capital project is identified for control purposes. This bill also provides funding for building renewal purposes. The budgets are prepared on a cash basis except that liabilities (encumbrances) incurred before the end of the fiscal year and paid within the "administrative adjustment" period (typically one year) are charged against the prior fiscal year's budget. With a few exceptions, such as the capital budgets, highway maintenance, and special line items, state appropriations typically lapse at the end of the fiscal year.

The Department relies on the Arizona Financial Information System (AFIS) to control total expenditures by appropriation and to ensure budgetary compliance and management control. These features of AFIS include: encumbrance and pre-encumbrance capabilities, appropriation allocation and control capabilities to the expense budget/organization unit level, and management control reports from the expense budget/organizational unit level, with summary reporting capabilities by program, division, or appropriation.

Factors Affecting Financial Condition

Arizona Economy Arizona experienced two dramatically different economic trends during FY 2020; growth through February 2020, followed by declines beginning in March, due to the coronavirus pandemic. The national economy also experienced these trends. The 12-month average price of gasoline in AZ decreased 5.9 percent in FY 2020. The 12-month average price of use fuel (diesel) decreased 6.7 percent in FY 2020. According to the Arizona Office of Economic Opportunity, the Arizona unemployment rate increased from 4.8 percent in June 2019 to 10.0 percent in June 2020. During this period, employment decreased by approximately 96,400 jobs. In FY 2019, Arizona employment increased by approximately 74,500 jobs.

The Department's two main funding sources, the Highway User Revenue Fund (HURF) and the Regional Area Road Fund (RARF), also known as the Maricopa County Transportation Excise Tax, were negatively impacted by the coronavirus pandemic. In FY 2020, the HURF revenue collections were \$1,480.8 million, 2.6 percent below FY 2019 and 5.6 percent below forecast. The Regional Area Road Fund revenues equaled \$491.1 million, an increase of 4.8 percent over FY 2019, and 1.3 percent below forecast.

Uncertainty still abounds regarding the future of the pandemic and the associated impacts to the economy. The September 1, 2020 University of Arizona Economic and Business Research Center Forecast Report forecasts Arizona non-farm employment will contract by 2.2 percent in calendar year 2020 and grow by 4.3 percent in calendar year 2021. According to the September 2020 Western Blue Chip report, personal income in Arizona is expected to decrease by 2.0 percent in calendar year 2020 and increase 4.6 percent in calendar year 2021, and the Arizona population is forecasted to grow by 1.1 percent in CY 2020 and 1.3 percent in CY 2021.

The Department's FY 2021 HURF revenue estimate amounts to \$1,514.2 million, an increase of 2.3 percent over fiscal year 2020¹. The HURF ten-year compound growth rate for fiscal years 2011 through 2020 was 2.2 percent. The distribution of HURF revenues in FY 2021 is forecasted to be as follows: State Highway Fund \$758.4 million; Arizona

¹Beginning FY 2018, ADOT changed the way HURF revenues are reported. Previously, "off-the-top" distributions from gas tax revenues to the State Lake Improvement Fund and Off-highway Vehicle Recreation Fund were not included in ADOT's published HURF revenues. Beginning in FY 2018, these two distributions are included in the reported HURF revenues.

cities and towns \$458.1 million; Arizona counties \$285.3 million; State Lake Improvement Fund and Off-highway Vehicle Recreation Fund \$10.7 million; Economic Strength Project Fund \$1.0 million; and the Motor Vehicle Division for the registration compliance/third party program \$0.68 million. An estimated \$35.4 million will be re-allocated from the State Highway Fund share of HURF vehicle license tax revenues with \$31.5 million going to the State General Fund and \$3.9 million going to the Department of Public Safety.

The Maricopa County Transportation Excise Tax revenue forecast for FY 2021 totals \$514.5 million, an increase of 4.8 percent over fiscal year 2020. The Maricopa County Transportation Excise Tax ten year compound growth rate for fiscal years 2011 through 2020 was 5.3 percent. The distribution of the Maricopa County Transportation Excise Tax revenue in FY 2021 is forecasted to be as follows: Maricopa County Regional Area Road Fund \$289.2 million for highways, \$54.0 million for arterial streets, and \$171.3 million for the Public Transportation Fund.

Long-term Financial Planning The Department has developed a long-range forecasting model for revenues to be deposited in the Highway User Revenue Fund and the Maricopa County Regional Area Road Fund. This econometric modeling approach provides a framework that allows for the complex interaction of economic, demographic, and technological factors which influence revenue collections over the long term. Using this process, the Department updates and publishes its official forecast on an annual basis, after the close of the fiscal year, and uses this data in developing cash-flow projections for the statewide Highway Construction Program and the Regional Transportation Plan (RTP) Freeway Program, two components of the Five-Year Transportation Facilities Construction Program (the other components being the Pima Association of Governments Highway Program and the Airport Program).

These cash-flow projections incorporate estimates of all funding sources available to the capital program and estimates of project-related and other expenditures.

Planned Construction Activity On October 27, 2020, the transportation board adopted the Five-year Transportation Facilities Construction Program for fiscal years 2021 through 2025. A total of \$5.7 billion of transportation facilities expenditures are planned during this time period. This includes \$2.7 billion for the statewide highway program, \$2.9 billion for the Regional Transportation Plan for Maricopa and Pima counties, and \$143 million for airports. Further details of the Five-year Transportation Facilities Construction Program for fiscal years 2021 through 2025 can be found at:

<https://azdot.gov/sites/default/files/media/2020/10/2021-2025-Final-Five-Year-Program.pdf>

Other Information

Single Audit The Department is required to undergo an annual Single Audit in accordance with the provisions of the Single Audit Act Amendments of 1996 and the U.S. Office of Management and Budget Title 2 U.S. Code of Federal Regulations Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards*. The Department's Single Audit information is included in the Single Audit of the State of Arizona for the fiscal year ended June 30, 2020.

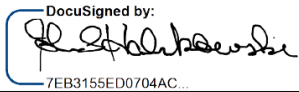

Awards The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the Arizona Department of Transportation for its Comprehensive Annual Financial Report for the fiscal year ended June 30, 2019. This accomplishment was the thirtieth consecutive year that the Department has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized Comprehensive Annual Financial Report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe our current Comprehensive Annual Financial Report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

Acknowledgments We would like to express our sincere appreciation to the many individuals whose dedicated efforts have made this report possible. A special note of thanks is extended to the staff of Fiscal Operations whose commitment, professionalism, and dedicated efforts contributed to the preparation of the fiscal year 2020 Comprehensive Annual Financial Report.

Respectfully Submitted,

INDEPENDENT AUDITORS' REPORT

The Honorable Douglas A. Ducey
Governor of the State of Arizona

Members of the Arizona State Legislature
Arizona Department of Transportation
Phoenix, Arizona

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Arizona Department of Transportation (Department), as of and for the year ended June 30, 2020, and the related notes to the financial statements, which collectively comprise the Department's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

The Honorable Douglas A. Ducey
Governor of the State of Arizona

Members of the Arizona State Legislature
Arizona Department of Transportation

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the Arizona Department of Transportation as of June 30, 2020, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matters

During the fiscal year ended June 30, 2020, the Department changed its method of amortizing bond premiums from the straight-line basis to the effective interest method. As a result, the Department reported a restatement to beginning net position of its Governmental Activities for the change in accounting principle. The restatement is described further in Note 6.D. to the financial statements. Our auditors' opinion was not modified with respect to the restatement.

As discussed in Note 1, the financial statements present only the Arizona Department of Transportation and do not purport to, and do not present fairly the financial position of the State of Arizona as of June 30, 2020, the changes in its financial position, or, where applicable, its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America. Our opinion was not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, budgetary comparison information, information about infrastructure assets reported using the modified approach, and the Department's proportionate share of the net pension liability and contributions, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

The Honorable Douglas A. Ducey
Governor of the State of Arizona

Members of the Arizona State Legislature
Arizona Department of Transportation

Supplementary and Other Information

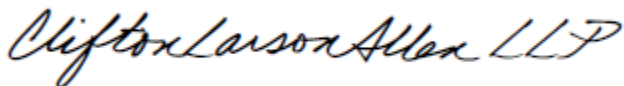

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Arizona Department of Transportation’s basic financial statements. The accompanying supplementary information, the Introductory Section and Statistical Section, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The Supplementary Information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the Supplementary Information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The Introductory Section and Statistical Section have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated January 15, 2021, on our consideration of the Department’s internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Department’s internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Department’s internal control over financial reporting and compliance.

**Arizona Department of Transportation
Management's Discussion and Analysis
For the Year Ended June 30, 2020**

As management of the Arizona Department of Transportation (the "Department"), we offer readers of the Department's financial statements this narrative overview and analysis of the financial activities of the Department for the fiscal year ended June 30, 2020. We encourage readers to consider the information presented here in conjunction with the [Letter of Transmittal](#) and the Department's [basic financial statements](#), with the accompanying [notes](#) and [Required Supplementary Information \(RSI\)](#).

Financial Highlights

Government-Wide

- The net position of the Department at the close of the fiscal year is \$22.3 billion. Of this amount, \$153.8 million represents the *unrestricted* component, \$775.3 million is *restricted*, and \$21.4 billion is *net investment in capital assets*.
- Beginning net position has been restated (decreased) by \$94.0 million due to a change in amortizing bond issue premiums from the straight-line method to the effective interest method. Net position of the Department increased by \$767.6 million, net of prior period adjustments. See [Note 6D](#) for further information.
- The Department's capital assets are \$23.8 billion, compared to \$23.1 billion for fiscal year 2019, an increase of 2.9%. This increase is attributable to the results of highway construction activity. The Department's *net investment in capital assets* is \$21.4 billion, compared to \$20.6 billion for fiscal year 2019, an increase of 3.9%.
- The Department's total liabilities are \$3.0 billion, compared to \$3.3 billion in 2019. The Department had \$177.4 million less in bonds outstanding in 2020 than in 2019. During fiscal year 2020, road construction refunding bonds of \$510.3 million were issued and \$687.7 million in bonds were retired.

Fund Level

- As of the close of the fiscal year, the governmental funds of the Department reported combined ending fund balances of \$1.3 billion, as compared to \$1.4 billion in 2019.
- The total restricted fund balance (governmental funds) is \$761.8 million; the majority of this amount is restricted for capital projects. Inventories of \$437 thousand represent the nonspendable portion of fund balance while \$507.0 million represents the committed fund balance portion.
- The enterprise fund reported net position at year-end of \$1.2 million, as compared to \$1.2 million in 2019.

Overview of Financial Statements

This discussion and analysis is intended to serve as an introduction of the Department's basic financial statements. The Department's basic financial statements consist of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains other Required Supplementary Information, in addition to the basic financial statements.

Government-wide Financial Statements (Reporting the Department as a Whole)

The government-wide financial statements are designed to present an overall picture of the financial position of the Department. These statements consist of the Statement of Net Position and the

Management's Discussion and Analysis
For the Year Ended June 30, 2020**

Statement of Activities, and are prepared using the accrual basis of accounting, which is similar to the accounting used by most private sector companies. All of the current year's revenues and expenses are taken into account regardless of when cash is received or paid.

The Statement of Net Position combines and consolidates the Department's current financial resources with capital assets and long-term obligations. This statement includes all of the Department's assets and liabilities.

Net position is the difference between the Department's assets and deferred outflows of resources less liabilities and deferred inflows of resources, and represents one measure of the Department's financial health.

- An increase or decrease in the Department's net position from one year to the next is an indicator of whether its financial health is improving or declining.
- Other indicators of the Department's financial health include the condition of its roads and bridges (infrastructure) and economic trends affecting the Department's future tax revenues.

The Statement of Activities focuses on both the gross and net cost of various activities (governmental and business-type); these costs are paid by the Department's general tax and other revenues. This statement summarizes the cost of providing specific Department services and includes all current year revenues and expenses.

The Statement of Net Position and the Statement of Activities divide the Department's activities into two types:

Governmental Activities-The Department's basic services are reported here, including administration, highway, highway maintenance, and motor vehicle. Taxes, fees, and federal grants finance most of these activities.

Business-type Activities-Activities for which the Department charges a fee to customers to pay for most or all of the costs of the services it provides are reported as business-type activities. The Department's Highway Expansion and Extension Loan Program (HELP) is reported here.

The government-wide financial statements can be found in the [Basic Financial State Financial Statements](#) section of this report.

This report includes two schedules (Exhibit 3.1 and Exhibit 4.1) that reconcile the amounts reported on the governmental fund financial statements (prepared using the modified accrual basis of accounting and current financial resources measurement focus) with governmental activities (prepared using the accrual basis of accounting and economic resources measurement focus) on the appropriate government-wide statements. The following summarizes the impact of utilizing Governmental Accounting Standards Board Statement 34 (GASB 34), as amended, reporting:

- Capital assets used in governmental activities are not reported on governmental fund statements.
- Long-term assets that are not available to pay for current period expenditures are not reported on governmental fund statements.
- Internal service fund activities are reported as governmental activities, but reported as proprietary funds in the fund financial statements.
- Debt service principal payments are reported as expenditures in the funds, but reduce long-term liabilities in the government-wide Statement of Net Position
- Unless currently due and payable, long-term liabilities, such as capital lease obligations, compensated absences, bonds, notes payable, and others only appear as liabilities on the government-wide statements.

**Arizona Department of Transportation
Management's Discussion and Analysis
For the Year Ended June 30, 2020**

- Capital outlay spending results in capital assets on the government-wide statements, but is reported as expenditures on the governmental fund statements.
- Bond and note proceeds result in liabilities on the government-wide statements, but are recorded as other financing sources on the governmental fund statements.
- Certain other outflows represent either increases or decreases in liabilities on the government-wide statements, but are reported as expenditures on the governmental fund statements.

Fund Financial Statements (Reporting the Department's Major Funds)

The fund financial statements provide detailed information about the major individual funds. A fund is an accounting entity with a self-balancing set of accounts that the Department uses to keep track of specific sources of funding and spending for a particular purpose. The Department, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the Department can be divided into two categories: governmental and proprietary.

Governmental Funds—A majority of the Department's activities are reported in governmental funds. Reporting of these funds focuses on how financial resources flow in and out of the funds, and amounts remaining at year-end for future spending. Governmental funds are accounted for using the modified accrual basis of accounting, which measures cash and other assets that can be readily converted to cash. The governmental fund statements provide a detailed short-term view of the Department's general governmental operations and the basic services it provides. This information should help determine whether there are more or less current financial resources available for the Department's programs. The reconciliations following the fund financial statements explain the differences between the government's activities, reported in the government-wide statement of activities, and the governmental funds.

The Department maintains fourteen individual governmental funds. Information is presented separately in the governmental funds Balance Sheet and the governmental funds Statement of Revenues, Expenditures, and Changes in Fund Balances for the General Fund (State Highway Fund), Maricopa Regional Area Road Construction Fund, Motor Vehicle Division Clearing Fund, Highway User Revenue Fund, Debt Service Fund, and Capital Projects Fund, which are considered to be major funds. Data from the other eight governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these nonmajor governmental funds are provided in the form of combining statements in the [Supplementary Information](#) of this report.

The legislature appropriates an annual budget from the Department's General Fund (State Highway Fund). The Budgetary Comparison Schedule – General Fund (State Highway Fund) has been provided to demonstrate compliance with this budget and is presented as Required Supplementary Information. The governmental funds financial statements can be found within the [Basic Financial Statements](#) section of this report.

Proprietary Funds: When the Department charges customers for the services it provides, these services are generally reported in proprietary funds. Proprietary funds (enterprise and internal service) utilize full accrual accounting, the same method used by most private sector businesses. Enterprise funds report activities that provide goods and services to outside customers, to other agencies, or to other divisions of the Department. The Department's enterprise fund is the Highway Expansion and Extension Loan Program Fund. The internal service fund reports activities that provide supplies and services for the Department's other programs and activities and other state agencies. The Equipment Revolving Fund is the Department's only internal service fund. Internal service fund activities are reported as

**Arizona Department of Transportation
Management's Discussion and Analysis
For the Year Ended June 30, 2020**

governmental activities on the government-wide statements. The proprietary funds financial statements can be found within the [Basic Financial Statements](#) section of this report.

Notes to the Financial Statements

The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found in the [Notes to Financial Statements](#) section of this report.

Required Supplementary Information

In addition to the basic financial statements, including accompanying notes, this section presents certain Required Supplementary Information including the Department's Budgetary Comparison Schedule – General Fund (State Highway Fund), the modified approach to reporting infrastructure assets, and the Pension Liability and Pension Contributions as per GASB statement 68, as amended. Required Supplementary Information can be found in the [Required Supplementary Information](#) section of this report.

Supplementary Information

Other Supplementary Information includes the combining statements for the nonmajor governmental funds and is presented immediately following the Required Supplementary Information. Combining fund statements and schedules can be found in the [Supplementary Information](#) section of this report.

Government-wide Financial Analysis

As noted earlier, net position may serve over time as a useful indicator of the Department's financial health. The following tables, graphs, and analysis address the net position and changes to net position for the Department as a whole as of and for the fiscal years ended June 30, 2020 and 2019.

The Department's combined net position increased by \$673.6 million (including the effect of a prior period adjustment, see [Note 6D](#)), or 3.1%, over the course of this fiscal year's operations. The net position of the governmental activities increased by \$673.6 million, or 3.1%; and business-type activities increased by \$21.7 thousand, or 1.8% over the previous year. The overall increase in the Department's net position was due primarily to an increase in the Department's infrastructure.

**Arizona Department of Transportation
Management's Discussion and Analysis
For the Year Ended June 30, 2020**

The following table reflects the condensed Statements of Net Position as of June 30, 2020 and 2019:

**Condensed Statements of Net Position
As of June 30,**

	Governmental Activities		Business-type Activities		Total Primary Government	
	2020	2019	2020	2019	2020	2019
Assets						
Current and other assets	\$ 1,581,927,133	\$ 1,758,340,269	\$ 1,217,820	\$ 1,196,071	\$ 1,583,144,953	\$ 1,759,536,340

Deferred Inflows of Resources						
	<u>106,638,693</u>	64,826,076	—	—	<u>106,638,693</u>	64,826,076
Net Position						
Net investment in capital assets	21,417,623,749	20,611,958,834	—	—	21,417,623,749	20,611,958,834
Restricted	775,342,739	962,898,860	—	—	775,342,739	962,898,860
Unrestricted	<u>152,558,336</u>	97,086,958	<u>1,217,820</u>	1,196,071	<u>153,776,156</u>	98,283,029
Total net position	<u>\$22,345,524,824</u>	\$21,671,944,652	<u>\$ 1,217,820</u>	\$ 1,196,071	<u>\$22,346,742,644</u>	\$21,673,140,723

The total assets of the Department (excluding deferred outflows of resources) were \$25.4 billion, while total liabilities (excluding deferred inflows of resources) were \$3.0 billion, resulting in a net position balance of \$22.3 billion. The majority of the Department's net position, \$21.4 billion (95.8%), was invested in capital assets (e.g., land, infrastructure, buildings, machinery, and equipment), net of any related debt used to acquire those assets. The Department uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the Department's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other resources, since the capital assets themselves cannot be used to liquidate these liabilities.

The governmental activities reported an increase in capital assets with the largest increase being in the area of infrastructure construction in progress.

More detailed information regarding beginning net position restatements is in [Note 6D](#).

**Arizona Department of Transportation
Management's Discussion and Analysis
For the Year Ended June 30, 2020**

Governmental Activities

The following chart depicts revenues of the governmental activities for the fiscal year ended June 30, 2020:

**Revenues – Governmental Activities
\$3,689,688,409**

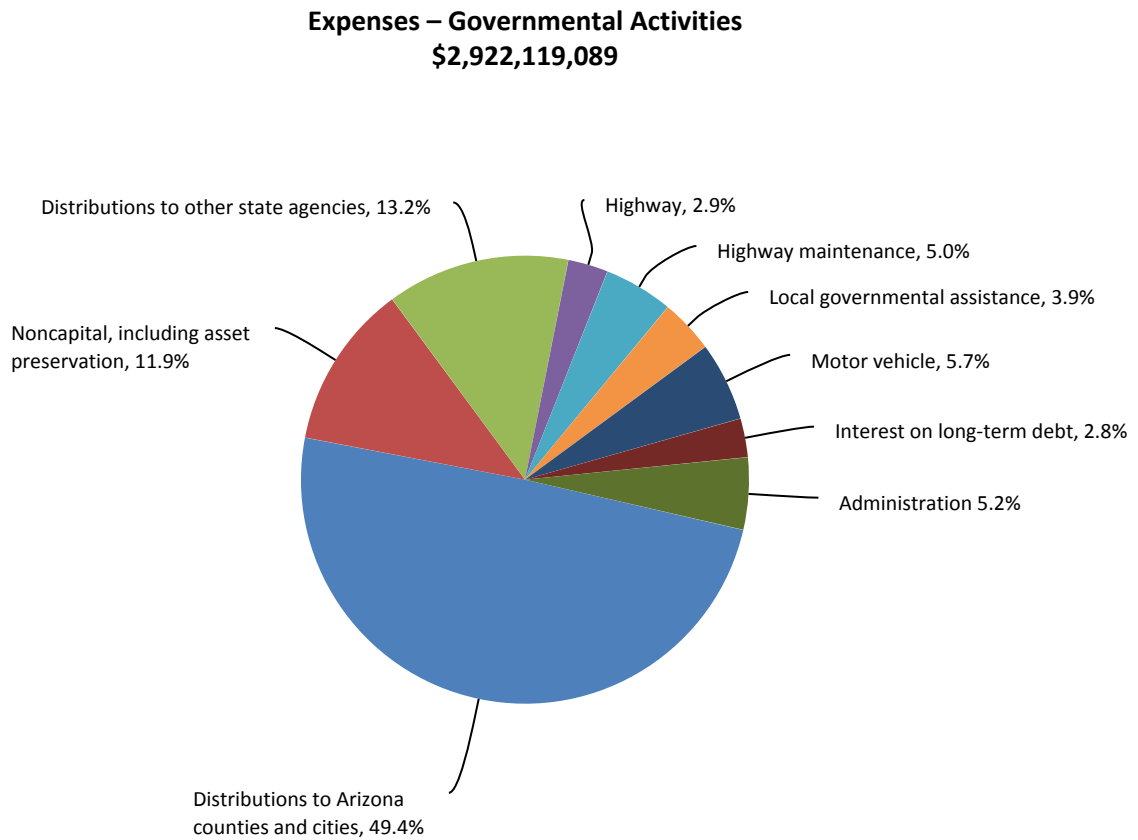

Of the Department's revenues, \$2.9 billion (or 77.7%) are from the following three revenue sources:

- Motor vehicle registration, title, license, and related taxes comprise the Department's largest revenue source of \$1.6 billion (42.4%).
- Fuel and motor carrier taxes and fees represent the Department's second largest revenue source of \$749.6 million (20.3%).
- Capital grants and contributions represent the Department's third largest revenue source of \$554.6 million (15.0%).

**Arizona Department of Transportation
Management's Discussion and Analysis
For the Year Ended June 30, 2020**

The Department's two main funding sources, the Highway User Revenue Fund (HURF) and the Regional Area Road Fund (RARF), also known as the Maricopa County Transportation Excise Tax, posted mixed year-results in fiscal year 2020. HURF collections totaled approximately \$1.5 billion, 2.6% below fiscal year 2019 and 6.0% below the forecast. Maricopa County Transportation Excise Tax collections totaled \$491.1 million, an increase of 4.8% over fiscal year 2019 and 1.3% below the Department's estimate. The Transportation Excise Tax distribution to the Department was \$331.0 million compared to \$316.1 million for fiscal year 2019. The negative variances from forecast primarily resulted from unanticipated revenue decreases from the Covid-19 pandemic.

The following chart depicts expenses of the governmental activities for the fiscal year ended June 30, 2020:

Of the Department's top three expenses, \$2.2 billion (or 74.5%) were for the following:

- Distributions to Arizona counties and cities comprise the Department's largest expense of \$1.4 billion (49.4%).
- Non-capital, including asset preservation, represents the Department's second largest expense of \$346.9 million (11.9%).
- Distributions to other state agencies represent the Department's third largest expense of \$385.1 million (13.2%).

**Arizona Department of Transportation
Management's Discussion and Analysis
For the Year Ended June 30, 2020**

Distributions to Arizona counties and cities increased in fiscal year 2020 as compared to fiscal year 2019 due to an increase in vehicle license tax and gas and fuel tax revenue collections. The distributions to other government entities (excluding distributions from the Local Agency Deposit Fund) equal \$1.8 billion (62.6%); making up more than half of the expenditures for fiscal year 2020.

Business-type Activities

Net position for business-type activities increased by \$22 thousand in fiscal year 2020. Total revenues were \$22 thousand, all of which came from income from investments. There were no operating expenses for business type activities during the year.

The Highway Expansion and Extension Loan Program did not approve or disburse any loans in Fiscal Year 2020, and no future program loans are planned at this time.

Financial Analysis of the Department's Funds

As previously mentioned, the Department uses fund accounting to ensure and demonstrate compliance with budgetary and legal requirements. The following is a brief discussion of financial highlights from the fund financial statements.

Governmental Funds: The focus of the Department's governmental funds financial statements ([Governmental Funds financial statements](#)) is to provide information on near-term inflows, outflows, and balances of spendable resources. All major governmental funds are discretely presented on these financial statements, while the nonmajor governmental funds are combined into a single column. Combining statements for the nonmajor governmental funds may be found in the [Supplementary Information](#) section of this report.

As of the end of the fiscal year, the fund balances of the governmental funds totaled \$1.3 billion, a decrease of \$145.7 million over the previous fiscal year. The majority of this amount is restricted for capital projects.

The General Fund (State Highway Fund) is the primary operating fund of the Department. At the end of the current fiscal year, the nonspendable fund balance was \$437 thousand; the restricted fund balance was \$301.0 million; and the committed fund balance was \$443.7 million.

The Maricopa Regional Area Road Construction Fund is a major special revenue fund that receives a portion of Maricopa County Transportation Excise Tax monies that are used to provide a funding source for the construction of new freeways and other routes, improvements to existing freeways and other routes, and improvements to the arterial street system within Maricopa County. Total revenues collected in the fund in fiscal year 2020 were \$511.4 million; Transportation Excise Tax revenue of \$326.5 million (or 63.9%) was a significant revenue source. The remaining revenue was mainly federal revenue, reimbursements from local governments within Maricopa county, and excess land sales.

The Debt Service Fund is used for the accumulation of resources for, and the payment of, general long-term debt principal and interest of the governmental funds. Other financing sources totaled \$316.3 million. Of this amount, \$141.2 million was transferred in from the General Fund (State Highway Fund), \$142.2 million was transferred in from Maricopa Regional Area Road Construction Fund, and \$30.9 million was transferred in from Grant Anticipation Notes Fund. In addition, proceeds from the HURF Series 2020 Refunding bonds totaled \$510.3 million. \$508.3 million was paid to the refunded bond escrow agent to accomplish this refunding, and is presented as other financing uses in the Debt Service Fund. See [Note 5E](#) for detailed information regarding the HURF Series 2020 refunding bond issuance.

The Capital Projects Fund is used to account for financial resources used for the acquisition or construction of major capital facilities in the governmental funds. In fiscal year 2020, the Capital

**Arizona Department of Transportation
Management's Discussion and Analysis
For the Year Ended June 30, 2020**

Projects Funds' expenditures were \$48.6 million. Non-capital, including asset preservation expenditures of \$32.1 million (66.1%) and Capital outlay expenditures of \$16.4 million (33.8%) accounted for the majority of the expenditures in the Capital Projects Fund. The expenditures were for major preservation and expansion pavement projects primarily financed by remaining proceeds from the Grant Anticipation Notes Series 2019A, issued fiscal year 2019. Please see the [Capital Asset and Debt Administration](#) section in the MD&A for more information. Capital outlay expenditures for the acquisition and construction of new highways was converted to capital assets on the government-wide statements.

Budget Variances

The Department's appropriated operating budget from the General Fund (State Highway Fund) increased by about \$13.5 million from fiscal year 2019 to fiscal year 2020. The increase was primarily due to the increased cost to maintain and operate new lane miles. In fiscal year 2019, the Department spent 84.7% of its budget and in fiscal year 2020 the Department spent 85.3% of its budget. Ultimately, the Department spent about \$13.8 million more in fiscal year 2020 than in fiscal year 2019 from its appropriated operating budget from the General Fund (State Highway Fund). Reference the budgetary comparison schedule in the [Required Supplementary Information](#) section of this report.

Capital Assets (See Note 5A to the financial statements for additional information)

The Department's investment in capital assets for its governmental and business-type activities as of June 30, 2020, amounts to \$23.8 billion (net of accumulated depreciation), a \$672.7 million increase over the previous fiscal year.

Capital Assets June 30, 2020

	Governmental Activities		Business-type Activities		Total

Total	<u>\$23,807,408,233</u>	<u>\$23,134,695,923</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$23,807,408,233</u>	<u>\$23,134,695,923</u>

As provided by accounting principles generally accepted in the United States (GAAP), the Department has elected to record its infrastructure assets using the modified approach, as defined in GASB Statement 34, as amended. Assets accounted for under the modified approach include 6,822 center line miles of roads (21,532 travel lane miles) and 4,900 bridges that the Department is responsible for maintaining.

The Five-Year Transportation Facilities Construction Program (the "Program") is a dynamic program and adjustments are made to the annual plans based on the needs of the Department to maintain the

**Arizona Department of Transportation
Management's Discussion and Analysis
For the Year Ended June 30, 2020**

condition level of the roads and bridges at a level equal to, or greater than, the goals established by the Department. The Program is updated annually and adjustments are made monthly during the fiscal year, as circumstances may require.

The Department manages its roads using the Present Serviceability Rating (PSR), which measures the condition of the pavement and its ability to serve the traveling public. The PSR uses a five-point scale (5 excellent, 0 impassable) to characterize the condition of the roadway. The Department's serviceability rating goal is 3.23 for the overall system. The Department's most recent assessment indicated that an overall rating of 3.54 was achieved for fiscal year 2020.

The Department manages its bridges using the Arizona Bridge Information and Storage System (ABISS). To comply with Federal standards, the Department is expected to maintain its Bridges to a condition where not more than 10.0% are classified as poor. The Department's most recent assessment indicated that 0.9% of the bridges were so classified for fiscal year 2020.

Noncurrent Liabilities (See Note 5E to the financial statements for additional information)

The Department's noncurrent liabilities for its governmental and business-type activities as of June 30, 2020, amount to \$2.75 billion, a decrease of \$188.46 million from the previous fiscal year.

The Department has issued revenue bonds in 40 separate issues since 2000. During 2020 the Department issued Highway Revenue Refunding Bonds, Series 2020. All outstanding bonds as of June 30, 2020, are scheduled to mature on various dates with none later than July 1, 2038. The bonds are obligations of the Transportation Board of the State of Arizona Department of Transportation (the "Transportation Board") and are not obligations of the State of Arizona.

Standard & Poor's Ratings Services and Moody's Investors Service have respectively rated the Senior lien Highway Revenue Bonds as AA+/Aa1 and subordinate lien Highway Revenue Bonds as AA+/Aa2; Transportation Excise Tax Revenue Bonds as AA+/Aa1; and the Grant Anticipation Notes as AA+/Aa2/AA with the additional rating of AA from Fitch Ratings.

Management's Discussion and Analysis
For the Year Ended June 30, 2020**

Requests for Information

This financial report is designed to provide our citizens, taxpayers, customers, investors, and creditors with an overview of the Department's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Controller, Arizona Department of Transportation, 206 S. 17th Avenue, Phoenix, Arizona, 85007, or by visiting our website at:

<http://www.azdot.gov/about/FinancialManagementServices/transportation-funding/financial-reports>.

BASIC FINANCIAL STATEMENTS

Government-wide Financial Statements – includes a statement of net position and a statement of activities. These statements report the overall Department activities. The statements also distinguish between the Department’s government and business-type activities. These statements are prepared utilizing the accrual basis of accounting for financial reporting.

Governmental and Proprietary Fund Financial Statements – provides information about the Department’s funds. Separate statements are presented for the governmental and proprietary fund categories. The emphasis of fund financial statements is on major governmental and enterprise funds, each displayed in a separate column. All remaining governmental and enterprise funds are aggregated and reported as nonmajor funds.

Notes to the Financial Statements – provide additional information that is essential for the full understanding of the data provided in the government-wide and fund financial statements.

GOVERNMENT-WIDE FINANCIAL STATEMENTS

Statement of Net Position – combines and consolidates the Department’s current financial resources with capital assets and long-term obligations. This statement includes all of the Department’s non-fiduciary assets and liabilities.

Statement of Activities – focuses on both the gross and net cost of various activities (governmental and business-type); these costs are paid by the Department’s general tax and other revenues. This statement summarizes the cost of providing specific Department services and includes all current year revenues and expenses.

GOVERNMENTAL FUNDS FINANCIAL STATEMENTS

MAJOR FUNDS

General Fund (State Highway Fund) – This fund is used to account for all financial transactions applicable to the general operations of the Department. The fund receives money from the Highway User Revenue Fund including vehicle registration, title, license, and related fees and fuel and motor carrier taxes. Reimbursements for certain construction expenditures are received from the federal government, Arizona cities and counties, and other state agencies. The fund also receives interest and other revenues. The fund disburses money primarily for the design, construction, and maintenance of state highways, parts of highways forming state routes, and highways under cooperative agreements with the United States and day-to-day operating expenses.

Maricopa Regional Area Road Construction Fund – This fund receives certain Maricopa County transportation excise tax monies collected by the Department of Revenue. These monies are used for the construction of new freeways and other routes, improvements to existing freeways and other routes, and improvements to the arterial streets within Maricopa County.

Motor Vehicle Division Clearing Fund – This fund accounts for the collection and disbursement of Motor Vehicle Division revenues.

Highway User Revenue Fund – This fund receives all revenues collected by the Department and its agents that are not designated for other purposes. The revenues include: motor fuel taxes, a portion of vehicle license tax, vehicle registration fees, driver license fees, dealer fees, permits, and other miscellaneous fees. These monies are distributed to the General Fund (State Highway Fund), the Department of Public Safety, the Economic Strength Project Fund, incorporated cities, counties, and other legislatively appropriated entities.

Debt Service Fund – This fund is used to administer all payments of principal and interest on bonds and notes issued by the Arizona Transportation Board for Highway Revenue Bonds, Transportation Excise Tax Revenue Bonds, and Grant Anticipation Notes (GARVEE bonds).

Capital Projects Fund – This fund is used to administer bond proceeds for Arizona Transportation Board Highway Revenue Bonds, Arizona Transportation Board Transportation Excise Tax Revenue Bonds, Grant Anticipation Notes (GARVEE bonds). These monies are expended for the construction of projects in the Five-Year Transportation Facilities Construction Program.

NONMAJOR FUNDS

Other Governmental Funds are the nonmajor funds and are all special revenue funds. These funds can be found on Exhibit 8 and Exhibit 9.

**Arizona Department of Transportation
Reconciliation of the Balance Sheet of Governmental
Funds to the Statement of Net Position
June 30, 2020**

Exhibit 3.1

Fund balances – total governmental funds (Exhibit 3)	\$ 1,261,164,942
Amounts reported for governmental activities in the statement of net position (Exhibit 1) are different because:	
Capital assets used in governmental activities are not financial resources and, therefore, are not reported in the funds (Note 4 B1).	23,739,715,663
Certain receivables are not available to pay for current period expenditures and, therefore, are reported as deferred inflows of resources in the funds (Exhibit 3).	11,854,336
Internal service funds are used by management to charge the costs of equipment rentals to individual funds. The assets and liabilities of the internal service funds are included in governmental activities in the statement of net position (Exhibit 5).	57,911,716
Deferred outflows of resources are not reported in the funds (Notes 4 B2).	109,928,564
OPEB liabilities are not due and payable from current financial resources and, therefore, are not reported in the funds (Note 4 B3).	(71,870,107)
Pension liabilities are not due and payable from current financial resources and, therefore, are not reported in the funds (Note 4 B4).	(234,347,438)
Long-term liabilities, including bonds payable, are not due and payable in the current period and, therefore, are not reported in the funds (Note 4 B5).	(2,425,095,666)
Certain deferred inflows of resources are not reported in the funds (Note 4 B6).	(103,737,186)
Net position of governmental activities (Exhibit 1)	<u>\$ 22,345,524,824</u>

The accompanying notes are an integral part of these financial statements.

**Arizona Department of Transportation
Reconciliation of the Statement of Revenues,
Expenditures, and Changes in Fund Balances of
Governmental Funds to the Statement of Activities
For the Year Ended June 30, 2020**

Exhibit 4.1

Net change in fund balances – total governmental funds (Exhibit 4)	\$ (145,697,490)
Amounts reported for governmental activities in the Statement of Activities (Exhibit 2) are different because:	
Capital outlays are reported as expenditures in governmental funds (Note 4 C1).	676,412,124
Bond proceeds provide current financial resources to governmental funds. However, issuing debt increases long-term liabilities in the statement of net position. Governmental funds report the effect of premiums, discounts, and similar items when the debt is first issued, whereas these amounts are deferred and amortized in the statement of activities (Note 4 C2).	(511,389,721)
Repayment of long-term debt is reported as an expenditure in governmental funds, but the repayment reduces long-term liabilities in the statement of net position (Note 4 C2).	745,338,088
Internal services funds are used by management to charge the cost of equipment rentals to individual funds. The change in net position of the internal service funds is reported with governmental activities (Note 4 C3).	(4,050,052)
Pension contributions are reported as expenditures in the governmental funds (Note 4 C4).	12,247,921
OPEB Contributions are reported as expenditures in governmental funds, however, the change in net OPEB liability is reported in the Statement of Activities (Note 4 C4)	(3,151,866)
Some items reported in the statement of activities do not require the use of, or provide current financial resources and, therefore, are not reported as revenues or expenditures in governmental funds (Note 4 C5).	(2,139,684)
Change in net position of governmental activities (Exhibit 2)	<u>\$ 767,569,320</u>

The accompanying notes are an integral part of these financial statements.

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

1) Summary of Significant Accounting Policies

The accounting and reporting policies of the Arizona Department of Transportation (the “Department”) conform in all material respects to accounting principles generally accepted in the United States of America (GAAP) as applicable to governments. The Governmental Accounting Standards Board (GASB) is the primary standard-setting body for establishing governmental accounting and financial reporting principles, which are primarily set forth in the GASB’s *Codification of Governmental and Financial Reporting Standards* (GASB Codification). Following is a summary of the Department’s significant accounting policies.

A. Reporting Entity

The Department is a department of the State of Arizona (the “State”) and is not a legally separate entity. The Department has no component units. The Director of the Department serves as the Chief Executive Officer and is directly responsible to the governor. The governor appoints a seven-member Transportation Board of the State of Arizona Department of Transportation (the “Transportation Board”), which has responsibility for establishing a complete system of state highway routes, approving all highway construction contracts, and distributing monies for local airport facilities’ projects through a grant program.

The Department is responsible for the construction and maintenance of all state highways. The Department cooperates with the various cities and counties within the State in the construction and maintenance of state roads and with the Federal Highway Administration in the construction and maintenance of interstate and other highways. Responsibilities of the Department also include grants to local airports, registering motor vehicles and aircraft, licensing drivers, certain law enforcement activities, and the publishing of the *Arizona Highways Magazine*.

B. Government-wide and Fund Financial Statements

The government-wide financial statements (i.e., the Statement of Net Position and the Statement of Activities) report information on all of the activities of the government. Governmental activities, which normally are supported by federal reimbursement, taxes, and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for services.

The Statement of Net Position presents the reporting entity’s assets, deferred outflows of resources, liabilities, and deferred inflows of resources, with the difference reported as net position. Net position is reported in three categories:

Net investment in capital assets consists of capital assets, net of accumulated depreciation and is reduced by outstanding balances for bonds, notes, and other debt that are attributed to the acquisition, construction, or improvement of those assets.

Restricted results when constraints placed on asset use are either externally imposed by creditors, grantors, contributors, and the like, or imposed by law through constitutional provisions or enabling legislation.

Unrestricted consists of those assets which do not meet the definition of the two preceding categories. Unrestricted often are designated to indicate that management does not consider them to be available for general operations. The unrestricted component often has constraints on resources which are imposed by

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

management, but can be removed or modified by management or the Transportation Board.

When both restricted and unrestricted resources are available for use, the Department generally expends the restricted resources first, and then unrestricted resources, as they are needed to maintain appropriate cash balances and finance the construction program.

The Statement of Activities demonstrates the degree to which the direct expenses of a given function are offset by program revenues. *Direct expenses* are those that are clearly identified with a specific function. Program revenues include: charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function; and grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Taxes and other items not properly included among program revenues are reported instead as *general revenues*.

Fund Financial Statements

Separate statements are provided for governmental funds and proprietary funds. Major individual governmental funds and major proprietary funds are reported as separate columns in the fund financial statements. Nonmajor funds are reported in a single column with combining statements provided in the supplementary information.

C. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the *economic resources measurement focus* and the *full accrual basis of accounting*, as are the proprietary funds. Revenues are recorded when earned and expenses are recorded when the liability is incurred, regardless of the timing of related cash flows. Taxes are recognized as revenues in the year they are collected for transportation excise, aircraft licensing, aviation and motor fuel, flight property, and underground storage tanks. Motor carrier and vehicle license taxes are recognized when received. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting*. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the Department considers revenues to be available if they are collected within 60 days of the end of the fiscal year, e.g., federal revenue reimbursements, vehicle license taxes, and highway user revenue taxes. Expenditures generally are recorded when a liability is incurred as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due and payable.

Financial Statement Presentation

The Department reports the following major governmental funds:

The *General Fund*, known as the State Highway Fund, is the primary operating fund. It accounts for all financial resources except for those required to be accounted for

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

in another fund. Expenditures are reported for general operations of the Department, including road and bridge repairs, maintenance and construction, planning and development, engineering, and administration. Revenues are received from the following primary sources: fuel and motor carrier taxes and fees, vehicle registrations, titles, licenses and related fees, and federal grants.

The *Maricopa Regional Area Road Construction Fund* is a special revenue fund that receives a portion of Maricopa County Transportation Excise Tax monies collected by the Department of Revenue. These monies are expended for the construction of new freeways and other routes, improvements to existing freeways and other routes, and improvements to the arterial street system, which are included in the Maricopa County Regional Transportation Plan.

The *Motor Vehicle Division Clearing Fund* is a special revenue fund which accounts for the collection and disbursement of certain Motor Vehicle Division revenues (e.g., vehicle registration, title, license, and related taxes and fees, and fuel and motor carrier taxes and fees).

The *Highway User Revenue Fund* is a special revenue fund which collects motor vehicle and fuel use taxes and receives certain Motor Vehicle Division revenues from the Motor Vehicle Division Clearing Fund. These monies are distributed to the General Fund (State Highway Fund), the Department of Public Safety, incorporated cities, towns, counties, and other legislatively appropriated entities.

The *Debt Service Fund* is used to account for the accumulation of resources for, and the payments of, general long-term debt principal and interest of the governmental funds.

The *Capital Projects Fund* is used to account for financial resources to be used for the acquisition or construction of major capital facilities in the governmental funds.

The Department reports the following major proprietary fund:

The *Highway Expansion and Extension Loan Program Fund (HELP)* is an innovative financing mechanism to administer funds designated to provide loan and credit enhancement assistance to sponsors of local transportation projects. The program is inactive as of June 30, 2020. See the separate Independent Audited Financial Reports for more information.

Additionally, the Department reports the following fund:

The *Internal Service Fund*, which accounts for purchases and maintenance of equipment and materials to be used by divisions in the Department and other government agencies. The Equipment Revolving Fund is the Department's only internal service fund.

As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are charges for services by the Equipment Revolving Fund to the other governmental functions. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

Amounts reported as *program revenues* include: charges for services, operating grants and contributions, and capital grants and contributions. Internally dedicated resources are reported as *general revenues* rather than program revenues. Likewise, general revenues include all taxes.

Proprietary funds distinguish *operating revenues* and expenses from *non-operating* items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues are charges for services, interest on loan receivables and other revenues intended to recover the cost of services. Operating expenses for the enterprise fund and the internal service fund include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

D. Assets Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources, and Net Position/Fund Balance

Deposits and Investments

The Department's cash includes petty cash and deposits with the State Treasurer for pooled investments. All investments are carried in the name of the State of Arizona. State statutes require the State Treasurer to invest these pooled funds in collateralized time certificates of deposit, repurchase agreements, obligations of the U.S. Government, or other permitted investments. All investments are carried at fair value. These balances are not subject to GASB Statement No. 3, *Deposits with Financial Institutions, Investments (including Repurchase Agreements), and Reverse Repurchase Agreements*, and GASB Statement No. 40, *Deposit and Investment Risk Disclosures – an amendment of GASB Statement No. 3*, classification because they are included in the state's investment pool.

The investment pool is not required to register (and is not registered) with the Securities and Exchange Commission under the 1940 Investment Advisors Act. The activity and performance of the pool is reviewed monthly by the State Board of Investment in accordance with Arizona Revised Statutes, §35-311. The fair value of investments is measured on a monthly basis. Participant shares are purchased and sold based on the Net Asset Value (NAV) of the shares. The NAV is determined by dividing the fair value of the portfolio by the total shares outstanding. The State Treasurer does not contract with an outside insurer in order to guarantee the value of the portfolio or the price of shares redeemed. As of June 30, 2020, the State's investment pool 2, pool 3, and pool 4 were not rated. The weighted average maturity at year-end for investment pool 2 was 3.22 years while for investment pool 3 was 0.84 years, and for investment pool 4 it was 3.28 years.

State statutes require the State Treasurer to maintain separate investment accounts for the portions of the Highway Revenue Bond Proceeds Fund relating to the Highway Revenue Bond issues and the Maricopa Regional Area Road Bond Proceeds Fund relating to the Transportation Excise Tax Revenue Bond issues. These funds may be invested by the Treasurer in the State's investment pool.

The Department's investments are included in the State investment pools and these investments are not shown in the Department's name. From the perspective of the Department, the pool functions as both a cash management pool and a demand deposit account. Therefore, the Department presents its equity in the internal pool as required in GASB Statement No. 31,

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

Accounting and Financial Reporting for Certain Investments and for External Investment Pools, and carries the investments at fair value.

The Department has restricted cash for payment of capital projects for Maricopa and Pima Counties, and for future debt service payments.

At June 30, 2020, the carrying amount of the Department's cash on deposit with the State Treasurer (unrestricted and restricted) totaled \$1,405,285,567. Of this amount, \$1,220,546,088 was invested in the State Agency's pool numbers 2, 3 and 4. The remaining \$184,739,479 is operating cash, and was not invested in the State's pools, but was held by the State Treasurer as demand deposit accounts. These pools are valued at the pool's share price multiplied by the number of shares the Department held. The fair value of a participant's position in the pools approximate the value of that participant's shares. The funds are invested in accordance with the Investment Policy of the Arizona State Treasurer's office.

Receivables, Payables and Advances

Activities between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as interfund receivables/payables. All other outstanding balances between the U.S. Government, Arizona counties and cities, and other state agencies are reported as due to/from. Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as internal balances.

Advances between funds, as reported in the fund financial statements, are classified as nonspendable fund balance in the General Fund (State Highway Fund) to indicate that they are not available for appropriation and are not expendable available financial resources. The other receivables are shown net of allowance for doubtful accounts. For other receivables comprising recoverable claims, the amount reserved for doubtful accounts is comprised of 100% of the balances sent to the Attorney General's Office for collection.

Notes receivable represents loans made to parties purchasing assets previously owned by the Department for highway construction purposes.

Inventories

The governmental activities inventory is valued at cost, which approximates market, using the moving average method. This inventory is accounted for using the consumption method. Under this method, inventories are recorded as expenditures as they are used. The fund financial statement reports inventory as nonspendable for the like amount indicating it does not constitute available expendable resources.

Costs of the internal service fund's inventories (consisting of vehicle parts and supplies, fuels and lubricants, and other supplies) are determined by moving average cost methods.

Restricted Assets

Certain proceeds of the Department's governmental revenue bonds, as well as certain resources of the General Fund (State Highway Fund) are classified as restricted assets on the balance sheet because they are maintained in separate accounts and their use is limited by applicable bond

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

covenants, constitutional mandates, or voter initiatives. State law, in conjunction with cooperative agreements with local governments, require 12.6% of the revenues allocated each year to the General Fund (State Highway Fund) from the Highway User Revenue Fund be allocated for design, purchase of right-of-way, or construction of controlled-access highways, arterial streets, and local highways that are included in the regional transportation plan of counties with populations in excess of 400,000 (Maricopa and Pima counties). State Transportation Board policy further allocates 2.6% of the revenues for the same purpose as listed above. The debt service fund is used to report the resources set aside for payment of future debt service. Bond proceeds deposited in the capital projects fund and are restricted by bond covenants for acquisitions of right-of-way and construction of federal, state, and local highways.

Capital Assets

Capital assets, which include land, buildings and improvements, improvements other than buildings, machinery and equipment, mobile fleet and aircraft, infrastructure, development in progress, and construction in progress, are reported in the applicable governmental or business-type columns in the government-wide financial statements. Capital assets are defined by the Department as assets with an initial, individual cost of \$5,000 or more and an estimated useful life in excess of one year. Purchased capital assets are recorded at historical cost or estimated historical cost if historical cost is not available. Donated capital assets are recorded at acquisition value at time of donation.

Costs of normal maintenance and repairs that do not add to the value of the asset or materially extend the asset's life are not capitalized. Outlays for capital assets are capitalized at the time of the purchase or, in the case of infrastructure, at the time of final acceptance by the Department from the contractor. Accumulated costs of infrastructure prior to final acceptance by the Department are reported as Construction in Progress. Asset preservation costs are expensed as incurred. The Department depreciates non-infrastructure capital assets on a straight-line basis using the following estimated useful lives:

Capital Assets	Useful Life
Buildings and improvements	20-40 years
Improvements other than buildings	15-40 years
Machinery and equipment	5 years
Mobile fleet and aircraft	5-15 years

Infrastructure was capitalized for the first time in fiscal year 2002. The infrastructure assets are reported in the governmental activities column of the Statement of Net Position. The Department's infrastructure assets consist of roads and bridges and are presented using the modified approach and, therefore, are not depreciated.

In order to utilize the modified approach, the Department is required to maintain an asset management system that includes an up-to-date inventory of eligible infrastructure assets, perform condition assessments of eligible assets and summarize the results using a measurement scale, estimate each year the annual amount to maintain and preserve the assets at the condition level established and disclosed by the Department, and document that the assets are being preserved approximately at or above the established condition level.

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

Deferred Outflows of Resources

Deferred outflows of resources represent a consumption of net position by the Department that applies to a future period, and therefore will not be recognized as an outflow of resources (expense) until then. Deferred outflows of resources increase net position, similar to assets. More detailed information regarding deferred outflows of resources can be found in the applicable footnotes to which such deferred outflows of resources applies.

Unearned/Unavailable Revenues

In the government-wide statements and proprietary fund financial statements, unearned revenues are recorded when cash, receivables, or other assets are received prior to revenue being recognized. Unearned revenue in the Governmental Activities represents subscription revenue received in advance of delivery of the related subscriptions. Additionally, in the governmental funds, unavailable revenue is reported as deferred inflows of resources, until such revenue is available to liquidate liabilities of the current period. Unearned revenues are reported in the government-wide statements for the governmental activities and in the fund statements for the governmental funds. In the fund statements, unavailable revenue represents a receivable from the Federal Highway Administration for un-reimbursed accrued relocation cost for various infrastructure projects.

Compensated Absences

It is the Department's policy to permit employees to accumulate earned but unused sick leave and vacation benefits as well as compensatory time. There is no liability for unpaid accumulated sick leave for the Department. All vacation pay and compensatory time is accrued when incurred in the government-wide and proprietary fund financial statements.

Effective July 1, 1998, state employees are eligible to receive payment for an accumulated sick leave balance of 500 hours or more with a maximum of 1,500 hours, upon retirement directly from state service. The benefit value is calculated by taking the employee's hourly rate of pay at the retirement date, multiplied by the number of sick hours at the retirement date, times the eligibility percentage. The eligibility percentage varies based upon the number of accumulated sick hours from 25% for 500 hours to a maximum of 50% for 1,500 hours. The maximum benefit value is \$30,000. Per Arizona Revised Statute 38-615D, the benefit shall be paid either in a lump sum or in installments over three years. The Retiree Accumulated Sick Leave Fund is accounted for on the State's financial statements as an Internal Service Fund.

Most employees accrue vacation time which is paid when taken or upon termination of employment at the individual's then current rate of pay. Additionally, some employees may earn compensatory time in lieu of overtime pay, which is paid in the same manner as vacation time. To limit the Department's liability, employees are allowed to carry forward a maximum of 240 hours of vacation time if covered and 320 hours if uncovered at the end of each calendar year. Compensatory time accrual is capped at 240 hours at any time, however the agency policy has been to evaluate and pay quarterly to keep this accrual low. The liabilities for vacation and compensatory time outstanding as of June 30 for both the governmental and proprietary funds are reported on the Statement of Net Position.

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

Long-Term Obligations

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities. Beginning in fiscal year 2020, bond premiums and discounts are deferred and amortized using the effective interest method; see [Note 6D](#) for further information. Bonds payable are reported net of the applicable premium or discount. Gains and losses related to refunding of debt are reported as deferred inflows of resources and deferred outflows of resources, respectively. Debt issuance costs are expensed in the current period. Other long-term obligations also include amounts that other governmental entities advance to the Department for highway road construction projects and accrued relocation costs. No intergovernmental advances are outstanding as of June 30, 2020.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as issuance costs, during the current period. The face amount of the debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures. Advances from other governmental entities are recorded as debt issuance in other financing sources.

Deferred Inflows of Resources

Deferred inflows of resources represent an acquisition of net position or fund balance that applies to a future period, and therefore will not be recognized as an inflow of resources (revenue) until that time. Deferred inflows of resources decrease net position or fund balance, similar to liabilities. More detailed information regarding deferred inflows of resources can be found in the applicable footnotes to which such deferred inflows of resources applies.

Net Position/Fund Balance

The difference between assets and deferred outflows of resources, and liabilities and deferred inflows of resources is “Net Position” on the government-wide and proprietary statements and “Fund Balance” on the governmental fund statements.

Fund balances for governmental funds may be reported in classifications that comprise a hierarchy based primarily on the extent to which the Department is bound to honor constraints on the specific purposes for which amounts in those fund can be spent. Five classifications are available:

Nonspendable fund balance – describes that portion that cannot be spent because of its form (inventories, prepaid amounts, etc.) and are not expected to be converted to cash.

Restricted fund balance – describes that portion of fund balance that reflects resources that are subject to externally enforceable legal restrictions (voter initiatives, court orders, etc.).

Committed fund balance – describes that portion which can be used only for specific purposes pursuant to constraints imposed by a formal action of the Department’s highest level of decision-making authority. This formal action is the

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

passage of law by the Legislature creating, modifying or rescinding fund balance commitments.

Assigned fund balance – describes that portion of that reflects the Department’s intended use of resources for a specific purpose, but are neither restricted nor committed.

Unassigned fund balance – is the residual classification for the general fund and includes all spendable amounts not reported in other classifications. Also, deficits in fund balances of other governmental funds are reported as unassigned.

The Department’s highest level of Authority is the Arizona State Legislature where the legislative appropriations are determined, identifying the uses of funds for specific purposes. The Arizona State Legislature also grants authority to other Boards (such as the Arizona State Transportation Board) and Commissions to authorize fund uses.

When practicable, the Department segregates restricted funds from unrestricted funds using existing chart of account elements. As a result, an assumption as to the order of how monies are spent is unnecessary for those restricted funds so segregated. In cases where it is impractical to segregate restricted from unrestricted funds, expenditures incurred for purposes for which restricted, committed and unassigned fund balance is available, the Department considers restricted, committed and unassigned amounts to have been spent in that order.

E. Revenues and Expenditures/Expenses

In the government-wide Statement of Activities, revenues and expenses are segregated by activity (governmental or business-type), then further by function (e.g., Administration, Highway). Additionally, revenues are classified between program and general revenues. Program revenues include charges for services, operating grants and contributions, and capital grants and contributions. Internally dedicated resources are reported as general revenue rather than as program revenue. General revenue includes all taxes and income on investments.

In the governmental fund financial statements, revenues are reported by source. Expenditures are reported by function (e.g., administration, distributions to Arizona counties and cities, distributions to other state agencies, debt service, capital outlay).

The distributions to Arizona counties and cities and distributions to other state agencies are shared tax revenues that are distributed based on statutory requirements. Debt service includes both interest and principal outlays that may be related to bonds, loans, advances, board funding obligations, or capitalized leases. Capital outlay includes expenditures for real property or infrastructure (i.e., bridges and roads).

Revenues and expenses of proprietary funds are classified as operating and non-operating and are sub-classified by the type of expense (e.g., salaries, equipment rental, depreciation). Operating revenues and expenses generally result from providing services and producing and delivering goods. All other revenues and expenses are reported as non-operating.

Other Financing Sources (Uses)

Other financing sources are additions to the governmental fund balances in the fund financial statements and include resources and financing provided by bond issuance, sale of capital

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

assets, capital leases where the leased asset(s) reside(s) in that fund, insurance recovery, and transfers from other funds. Other financing uses are reductions of governmental fund resources in fund financial statements normally resulting from transfers to other funds.

F. Interfund Activity and Balances

Interfund Activity

As a general rule, the effect of interfund activity has been eliminated from the government-wide statements. Exceptions to this rule are activities between the funds reported as governmental activities and the funds reported as business-type activities (e.g., the transfer of the gain or loss from the Equipment Revolving Fund).

Interfund Balances

Interfund receivables and payables have been eliminated from the Statement of Net Position, except for the residual amounts due between governmental and business-type activities.

G. Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make a number of estimates and assumptions that affect the reported amounts of assets, deferred outflow of resources, liabilities, deferred inflows of resources, and net position, the disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses/expenditures during the reporting period. Actual results could differ from those estimates.

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

2) Funds by Classification

Funds

The following table lists all of the funds whose balances are reflected in this financial report.

FUND TYPES	
MAJOR FUNDS	NONMAJOR FUNDS
<i>Governmental Funds</i>	<i>Special Revenue Funds</i>
General Fund (State Highway Fund)	State Aviation Fund
Special Revenue Funds:	Safety Enforcement and
Maricopa Regional Area Road	Transportation Infrastructure Fund
Construction Fund	Motor Vehicle Liability Insurance
Motor Vehicle Division Clearing Fund	Enforcement Fund
Highway User Revenue Fund	Motor Vehicle Inspection and Title
Debt Service Fund	Enforcement Fund
Capital Projects Fund	Motor Carrier Safety Revolving Fund
<i>Proprietary Funds</i>	Economic Strength Project Fund
Enterprise Fund:	Grant Anticipation Notes Fund
Highway Expansion and Extension	Local Agency Deposits Fund
Loan Program Fund	<i>Internal Service Fund:</i>
	Equipment Revolving Fund

3) Budgeting, Budgetary Control and Legal Compliance

An annual budget for the operating expenditures of the General Fund (State Highway Fund) is submitted to the governor in accordance with state law. The budget is legally enacted as appropriations after approval by the state legislature and signature of the governor. The legal level of control for operating expenditures is set at the agency level and expenditure budgets are appropriated using special line-item appropriations for highway maintenance, vehicles and construction equipment, other capital expenditures, and Attorney General legal services. Expenditure details for personal services, employee-related expenditures, and all other operating expenditures are specifically allocated within all divisions. In certain divisions, other specific programs are allocated in addition to these categories. Revenue budgets are developed internally by the Department and are not part of the appropriation process.

Amendments to the approved appropriations require legislative approval. However, since the Department's appropriation is a lump sum appropriation, the allocation of funds between personal services, employee-related expenditures, and other operating expenditures is an internal decision. Accordingly, transfers between line items such as personal services and other operating expenditures within a particular program may be made by the program manager. Expenditures may not exceed appropriations in total. All transfers of funds are reported to the Department's Office of Strategic Planning and Budgeting for monitoring purposes.

Budgets are prepared on the cash basis except that liabilities incurred before the end of the fiscal year and paid within the first month of the subsequent fiscal year are charged against the

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

prior fiscal year's budget. The Department's appropriations lapse at fiscal year-end unless exempted by the legislature.

In addition, budgets for capital outlay, including land, building, and improvements for the State Highway Fund and State Aviation Fund, are also submitted to the governor in accordance with state law. The capital outlay appropriation includes state highway construction and land, building, and improvements for the State Highway Fund. A legal limitation is adopted for land, building, and improvements; however, legislation allows the Department to spend in excess of its appropriation for state highway construction up to the current fund balance. The Department monitors expenditures through an internal budgetary process and the Five-Year Transportation Facilities Construction Program approved by the Transportation Board.

4) Accounting Pronouncements and Reconciliation of Government-Wide and Fund Financial Statements

A. New Accounting Pronouncements

For the year ended June 30, 2020, the Department implemented the provisions of the following GASB pronouncements:

- GASB Statement No. 84, *Fiduciary Activities* – to improve guidance regarding the identification of fiduciary activities for accounting and financial reporting purposes and how those activities should be reported. The requirements of this pronouncement did not impact the Department's financial statements.
- GASB Statement No. 95, *Postponement of the Effective Dates of Certain Authoritative Guidance* - This statement postpones implementation dates of several GASB pronouncements due to the Covid-19 pandemic. GASB Statement No. 87, *Leases*, is the only postponed pronouncement that has a material impact to the Department's financial statements. Pursuant to GASB 95, the requirements of GASB 87 are effective for reporting periods beginning after June 15, 2021, and all reporting periods thereafter.
- GASB Technical Bulletin No. 2020-1, *Accounting and Financial Reporting Issues Related to the Coronavirus Aid, Relief, and Economic Security Act (CARES Act) and Coronavirus Diseases* - to answer accounting and financial reporting questions regarding the CARES Act. The requirements of this Technical Bulletin are effective immediately.

Except for GASB Statement No. 95, the implementation of the above GASB Statements and other authoritative guidance did not have a material effect on the Department's financial statements.

B. Explanations of Reconciling Items of the Balance Sheet of Governmental Funds to the Statement of Net Position

The governmental funds Balance Sheet includes reconciliation between total fund balances – governmental funds and net position of governmental activities as reported on the government-wide Statement of Net Position. The following explanations are necessary to clarify these differences between the governmental fund Balance Sheet and the government-wide Statement of Net Position:

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

1. Capital assets are not included on the fund statements, but are included on the government-wide statement as follows:

Capital assets not subject to depreciation	\$ 23,541,244,768
Capital assets subject to depreciation	266,163,465
	23,807,408,233
Less: Internal Service Fund (Equipment Revolving Fund) capital assets	(67,692,570)
	\$ 23,739,715,663

2. Deferred outflows of resources are not reported in the governmental funds, but are reported in the government-wide Statement of Net Position. The detail for the difference is as follows:

Deferred outflows of resources related to pensions	\$ 25,687,671
Less: Internal Service Fund (Equipment Revolving Fund) deferred outflows of resources related to pensions	(1,195,951)
	24,491,720
Deferred outflows of resources-loss on debt refunding	68,656,914
	\$ 93,148,634
Deferred outflows of resources relating to OPEB	\$ 17,648,223
Less: Internal Service Fund (Equipment Revolving Fund) deferred outflows of resources related to OPEB	(868,293)
	\$ 16,779,930

3. OPEB liabilities are as follows:

Net OPEB liability	\$ (75,589,090)
Less: Internal Service Fund (Equipment Revolving Fund) net OPEB liability	3,718,983
	\$ (71,870,107)

4. Pension liabilities are not due and payable from current financial resources and, therefore, are not reported in the governmental funds. The detail for the difference is as follows:

Net pension liability	\$ (246,681,510)
Less: Internal Service Fund (Equipment Revolving Fund) net pension liability	12,334,072
	\$ (234,347,438)

5. Long-term liabilities, including bonds payable, are not due and payable in the current period, and are not reported in the current period on the fund statements. The detail for the difference is as follows:

Bonds payable (including unamortized premium)	\$ (2,389,371,379)
Compensated absences	(18,601,428)
Other noncurrent liabilities, including accrued relocation costs	(17,122,859)
	\$ (2,425,095,666)

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

6. Deferred inflows of resources are not reported in the governmental funds. The detail for the difference is as follows:

Deferred inflows of resources related to pensions	\$	(31,096,342)
Less: Internal Service Fund (Equipment Revolving Fund) deferred inflows of resources related to pensions		1,554,817
		\$ (29,541,525)
Deferred inflows of resources related to OPEB	\$	(27,371,739)
Less: Internal Service Fund (Equipment Revolving Fund) deferred inflows of resources related to OPEB		1,346,690
		\$ (26,025,049)
Deferred inflows of resources gain on debt refunding	\$	(48,170,612)

C. Explanations of Reconciling Items of the Statement of Revenues, Expenditures, and Changes in Fund Balances of Governmental Funds to the Statement of Activities

The governmental funds Statement of Revenues, Expenditures, and Changes in Fund Balances includes a reconciliation between net change in fund balances – total governmental funds and changes in net position of governmental activities as reported on the government-wide Statement of Activities. The following explanations are necessary to clarify these differences between the governmental fund Statement of Revenues, Expenditures, and Changes in Fund Balances and the government-wide Statement of Activities:

1. Governmental funds report capital outlay as expenditures. However, in the Statement of Activities, these costs are removed; some costs are capitalized as assets while other costs are expensed as follows:

Capital outlay	\$	724,048,171
Assets removed from service, net of accumulated depreciation		(43,927,345)
Capitalized relocation costs for the South Mountain Project accrued as a long term liability		10,622,859
Less: depreciation expense - governmental funds		(7,341,669)
Less: Prior Year Relocation Costs and Condemnation Judgment - government wide		(9,508,138)
Net prior year adjustments		2,518,246
		\$ 676,412,124

2. The issuance of long-term debt (e.g., bonds) provides current financial resources to governmental funds, while the repayment of principal of long-term debt consumes current financial resources of the governmental funds. Neither transaction, however, has any effect on net position. Also, the government reports the effect of premiums, discounts, and similar items when debt is first issued, whereas these amounts are amortized in the Statement of Activities. The details of this difference are as follows:

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

Debt issued or incurred:	
Issuance of Highway Revenue Bonds	\$ (510,275,000)
Net Change in accrued relocation costs	(1,114,721)
	<u>\$ (511,389,721)</u>

Principal repayments	
Highway Revenue Refunding Bonds	\$ 87,150,000
Transportation Excise Tax Revenue Refunding Bonds	107,950,000
Grant Anticipation Notes	19,665,000
Payment to refunded Bond escrow agent	508,277,669
Amortization of premium and discount	27,341,998
Amortization of net deferred losses on refunding	(5,046,579)
	<u>\$ 745,338,088</u>

3. The Internal Service Fund (Equipment Revolving Fund) is used by the Department to charge the cost for purchases and maintenance of equipment and material to be used by other funds and state agencies. The gain /(loss) in the Internal Service Fund (Equipment Revolving Fund) represents over/(under) billing and must be eliminated from the government-wide Statement of Activities for the governmental activities.

Internal Service Fund (Equipment Services Revolving Fund)	
Changes in net position	<u>\$ (4,050,052)</u>

4. Pension and OPEB contributions are reported as expenditures in the governmental funds in the fiscal year contributed. However, current year contributions are reported as deferred outflows of resources in the government-wide Statement of Net Position because the reported net pension liability and net OPEB obligation is measured a year before the Department's current fiscal year-end financial statements. Pension and OPEB expense, which is the change in net pension liability/net OPEB obligation adjusted for changes in deferred outflows and inflows of resources related to pensions and OPEB, is reported in the Statement of Activities:

Pension contributions	\$ 19,267,577
Pension expense	(7,019,656)
	<u>\$ 12,247,921</u>
OPEB expense, net of Internal Service Fund	<u>\$ (3,151,866)</u>

5. Some items reported in the Statement of Activities do not provide or require the use of current financial resources and, therefore, are not reported in the governmental funds. The details are as follows:

Certain accruals of federal grant reimbursements do not provide current financial resources, and, therefore, are not reported in the funds.	\$ 3,210,563
Net change in accrued relocation/condemnation reimbursement revenue does not provide current financial resources, and, therefore, is not reported in the funds	(3,883,173)
Compensated absences	(1,467,074)
	<u>\$ (2,139,684)</u>

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

5) Detailed Notes on All Funds and Activities

A. Capital Assets

Capital assets activity for the year ended June 30, 2020, was as follows:

	July 1, 2019			June 30, 2020	
	Beginning Balance	Increases	Decreases	Transfers	Ending Balance
<i>Governmental Activities</i>					
Capital assets, not being depreciated					
Land	\$ 3,511,601,121	\$ 10,942,429	\$ (43,822,589)	\$ —	\$ 3,478,720,961
Infrastructure	16,450,541,973	—	—	116,584,411	16,567,126,384
Construction in progress	2,921,982,661	689,999,173	—	(116,584,411)	3,495,397,423
Development in progress	65,224,581	15,398,123	—	(80,622,704)	—
Total capital assets, not being depreciated	<u>22,949,350,336</u>	<u>716,339,725</u>	<u>(43,822,589)</u>	<u>(80,622,704)</u>	<u>23,541,244,768</u>
Capital assets, being depreciated					
Buildings and improvements	217,456,654	3,740,532	—	—	221,197,186
Improvements other than buildings	37,778,933	9,748	—	—	37,788,681

Mobile fleet and aircraft	(127,645,278)	(12,756,199)	8,833,684	—	(131,567,793)
Total accumulated depreciated	<u>(308,412,863)</u>	<u>(21,107,627)</u>	<u>9,942,415</u>	<u>—</u>	<u>(319,578,075)</u>
Total capital assets, being depreciated, net	<u>185,345,587</u>	<u>1,239,645</u>	<u>(1,044,471)</u>	<u>80,622,704</u>	<u>266,163,465</u>
Governmental activities capital assets, net	<u>\$ 23,134,695,923</u>	<u>\$ 717,579,370</u>	<u>\$ (44,867,060)</u>	<u>\$ —</u>	<u>\$ 23,807,408,233</u>

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

Capital asset additions are not included on the fund statements, but are included on the government-wide Statement of Net Position, as follows:

Capital asset additions not subject to depreciation	\$ 716,339,725
Capital asset additions subject to depreciation	<u>22,347,272</u>
	738,686,997
Add: Accrued relocation costs (long-term liability) added in prior fiscal year	9,508,138
Less: Internal Service Fund (Equipment Services Fund) asset additions	(11,005,859)
Accrued relocation costs (long-term liability)	(10,622,859)
Adjustment related to capital outlay and capital asset additions timing differences	<u>(2,518,246)</u>
Total capital outlay	<u><u>\$ 724,048,171</u></u>

Depreciation expense was charged to functions/programs as follows:

<i>Governmental activities</i>	
Administration	\$ 2,065,946
Highway	920,645
Highway maintenance	2,103,388
Motor vehicle	<u>2,251,690</u>
	7,341,669
Capital assets held by the Department's internal service fund are charged to the various functions based on their usage of the assets	<u>13,765,958</u>
Total depreciation expense	<u><u>\$ 21,107,627</u></u>

B. Construction Commitments

The Department's outstanding commitments for contracts at June 30, 2020, were \$1.9 billion. Commitments are first categorized by segregating between Local government assistance and State Highway construction and related phases, and then further classified by phase of construction, as presented in the following table.

	Remaining Commitment
Local government assistance	\$ 164,710,823
State highways	
Construction	778,503,202
Design	233,160,651
Right of way	230,156,459
Utilities	20,454,829
Planning and research	59,675,706
Other	363,476,168
	<u><u>\$ 1,850,137,838</u></u>

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

C. Interfund Receivables, Payables, Advances, and Transfers

The balances of current interfund receivables and payables as of June 30, 2020, were:

Receivables	Payables	Amount
Governmental activities		
General Fund (State Highway Fund)	Equipment Services Fund	\$ 712,478
	Highway User Revenue Fund	101,130,334
	Motor Vehicle Division Clearing Fund	7,901,496
Motor Vehicle Division Clearing Fund	General Fund (State Highway Fund)	5,913,299
	Highway User Revenue Fund	15,196,792
	Non-major governmental funds	22,857
Highway User Revenue Fund	Motor Vehicle Division Clearing Fund	63,517,135
Non-major governmental funds	Motor Vehicle Division Clearing Fund	<u>341,642</u>
		<u>\$ 194,736,033</u>

The General Fund (State Highway Fund) receivable of \$101.1 million is an accrual for fuel taxes and vehicle license tax imposed in fiscal year 2020 from the Highway User Revenue Fund that will be collected in fiscal year 2021.

The Motor Vehicle Division Clearing Fund receivable of \$15.2 million is an accrual for vehicle license taxes due in fiscal year 2020 from the Highway User Revenue Fund that will be collected in fiscal year 2021.

The Highway User Revenue Fund receivable of \$63.5 million is an accrual for vehicle license taxes due in fiscal year 2020 from the Motor Vehicle Division Clearing Fund that will be collected in fiscal year 2021.

Interfund transfers for the year ended June 30, 2020, consisted of the following:

	<u>Transfers To</u>
<u>Transfers from</u>	<u>Debt Service Fund</u>
General Fund (State Highway Fund)	\$ 141,219,592
Maricopa Regional Area Road Fund	142,181,382
Non-major Governmental Funds	<u>30,853,950</u>
Total Debt Service Fund	<u>\$ 314,254,924</u>

Transfers from the General Fund (State Highway Fund), Maricopa Regional Area Road Fund, and the Non-major Governmental Fund (GANS) into the Debt Service Fund are to pay bond debt service.

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

D. Leases

Capital Leases

The Department has entered into lease agreements as lessee for financing the acquisition of various vehicles, equipment, and modular buildings. Capital leases are not material to the Department's financial statements, and, therefore, are not reported therein.

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

E. Noncurrent Liabilities

Arizona Transportation Board Highway Revenue Bonds

The Transportation Board has issued Senior and Subordinate Lien Highway Revenue Bonds to provide funds for acquisition of right-of-way, design, and construction of federal and state highways. The balance of Highway Revenue Bonds issued in prior years and outstanding at the start of the fiscal year was \$1.281 billion.

The Highway Revenue Bonds are secured by a prior lien on and a pledge of motor vehicle and related fuel fees and taxes of the General Fund (State Highway Fund). On September 21, 2006, House Bill 2206 became effective and eliminated the restriction that limited the principal amount of Highway Revenue Bonds that could be outstanding at any time to \$1.3 billion. Also, during fiscal year 2007, the Transportation Board received legislative authority to begin issuing Highway Revenue Bonds with maturities up to 30 years in length, replacing the 20-year maturity requirement that had been in place since 1980.

Highway Revenue Bonds currently outstanding are as follows:

Outstanding Highway Revenue Bonds
As of June 30, 2020

Maturity (7/1)	Series 2011A		Series 2013A		Series 2015		Series 2016		Series 2020

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

Annual debt service requirements to maturity for Highway Revenue Bonds are as follows:

Fiscal year ending June 30,	Highway Revenue Bonds		
	Principal	Interest	Total
2021	\$ 92,545,000	\$ 47,651,549	\$ 140,196,549
2022	96,925,000	43,279,155	140,204,155
2023	98,080,000	40,402,192	138,482,192
2024	102,355,000	36,136,147	138,491,147
2025	95,140,000	33,341,572	128,481,572
2026-2030	442,600,000	121,226,419	563,826,419
2031-2035	238,660,000	40,166,614	278,826,614
2036-2038	64,695,000	3,989,539	68,684,539
	<u>\$ 1,231,000,000</u>	<u>\$ 366,193,187</u>	<u>\$ 1,597,193,187</u>

The Department has pledged future motor vehicle and related fuel fees and taxes to repay \$1.23 billion in outstanding Highway Revenue Bonds issued since 2011. Proceeds from the bonds finance portions of the Transportation Board's Five-Year Transportation Facilities Construction Program, and to refund certain maturities of outstanding Highway Revenue bond issues. The bonds are payable solely from motor vehicle and related fuel fees and taxes and are payable through 2038. The total principal and interest remaining to be paid on the bonds is \$1.6 billion. Principal and interest paid for the current year and total pledged revenues were \$142.7 million and \$682.3 million respectively. The annual principal and interest payments on the bonds required 20.9% of the pledged revenues.

Bond Issuance

On February 12, 2020, the Transportation Board issued \$510.3 million of Taxable Highway Revenue Refunding Bonds Series 2020 (Series 2020 bonds), with interest rates ranging from 1.683% to 3.166% and serial maturities ranging from 2020 to 2038. Net proceeds totaled \$508.3 million, after payment of \$2.0 million of issuance costs and underwriter's discount. The net proceeds were used to refund, in advance of maturity, portions of the outstanding Series 2011A and Series 2013A Highway Revenue Bonds. The advance-refunding resulted in a debt service savings of \$55.3 million, and a net present value economic gain of \$45.5 million (difference between the present values of the old and new debt service payments). The advance-refunding also resulted in a difference between the reacquisition price and the net carrying amount of the refunded debt of \$51.1 million. This difference, reported as a deferred inflow of resources, is being amortized to interest expense on a straight-line basis through fiscal year 2038.

Arizona Transportation Board Transportation Excise Tax Revenue Bonds

The Maricopa Regional Area Road Construction Fund is used to record all payments of principal and interest for Transportation Excise Tax Revenue Bonds issued by the Transportation Board. These bonds are secured by a portion of transportation excise taxes collected by the Arizona Department of Revenue on behalf of Maricopa County. The balance of Transportation Excise Tax Revenue Bonds issued in prior years and outstanding at the start of the fiscal year was \$732.365 million.

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

All Transportation Excise Tax Revenue Bonds mature no later than July 1, 2025. Transportation Excise Tax Revenue Bonds currently outstanding are as follows:

Maturity (7/1)	2011 Series		2014 Series		2016 Series		2018 Series	
	Principal	Coupon	Principal	Coupon	Principal	Coupon	Principal	Coupon
2021	\$ 12,555,000	5.000%	\$ 53,065,000	5.000%	\$ 12,465,000	5.000%	\$ 35,205,000	5.000%

	<u>\$ 624,415,000</u>	<u>\$ 94,155,800</u>	<u>\$ 718,570,800</u>

The Department has pledged future transportation excise taxes to repay \$624.4 million in outstanding Transportation Excise Tax Revenue Bonds issued since 2009. Proceeds from the bonds pay the costs of design, right-of-way purchase, or construction of certain freeways and other routes within Maricopa County and to refund certain maturities of various outstanding Transportation Excise Tax Revenue bond issues.

The bonds are payable solely from transportation excise taxes and are payable through 2025. The total principal and interest remaining to be paid on the bonds is \$718.6 million. Principal and interest paid for the current year and total pledged revenues were \$143.7 million and \$326.5 million, respectively. The annual principal and interest payments on the bonds required 44.0% of the pledged revenues.

Arizona Transportation Board Grant Anticipation Notes

The Grant Anticipation Notes Fund administers all payments of principal and interest for notes issued by the Transportation Board and is secured by revenues received from the Federal Highway Administration under grant agreements and certain other federal-aid revenues. The balance of Grant Anticipation Notes issued in prior years and outstanding at the start of the fiscal year was \$223.885 million.

Arizona Department of Transportation

2031-2034	32,660,000	3,588,500	36,248,500
	<u>\$ 204,220,000</u>	<u>\$ 60,289,550</u>	<u>\$ 264,509,550</u>

The Department has pledged federal revenues to repay \$204.2 million in outstanding Grant Anticipation Notes. Proceeds from the bonds pay the costs of design, right-of-way purchase, or construction of certain freeways and other routes within Arizona and to refund certain maturities of various outstanding Grant Anticipation Notes. The bonds are payable solely from federal revenues and are payable through 2034. The total principal and interest remaining to be paid on the bonds is \$264.5 million. Principal and interest paid for the current year and total pledged revenues were \$30.9 million and \$665.5 million, respectively. The annual principal and interest payments on the bonds required 4.6% of the pledged revenues.

Refunded Bonds Deposited with Escrow Agents

In the prior fiscal years, the Transportation Board refinanced various bond issues through refunding arrangements. Under the terms of the refunding bond issues, sufficient assets to pay all principal, redemption premium, if any, and interest on the refunded bond issues have been placed in irrevocable trust accounts at commercial banks and invested in U.S. Government securities which, together with interest earned thereon, will provide amounts sufficient for future payment of principal and interest of the issues refunded. The assets, liabilities, and financial transactions of these trust accounts and the

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

liability for these legally defeased bonds are not reflected in the financial statements of the Department.

Changes in Noncurrent Liabilities

The activity for the fiscal year ended June 30, 2020, was as follows:

	Beginning Balance, as restated July 1, 2019	Additions	Reductions	Ending Balance June 30, 2020	Due Within One Year
<i>Governmental activities</i>					
Bonds and notes					
Highway Revenue bonds	\$ 1,280,830,000	\$ 510,275,000	\$ (560,105,000)	\$ 1,231,000,000	\$ 92,545,000
Transportation Excise Tax Revenue bonds	732,365,000	—	(107,950,000)	624,415,000	113,290,000
Grant Anticipation notes	223,885,000	—	(19,665,000)	204,220,000	19,760,000
Unamortized premium on bonds	443,543,539	—	(113,807,160)	329,736,379	40,208,252
Total bonds and notes	2,680,623,539	510,275,000	(801,527,160)	2,389,371,379	265,803,252
Compensated absences	17,829,377	12,136,859	(10,634,432)	19,331,804	10,634,432
Other noncurrent liabilities, including accrued relocation costs	16,008,138	1,114,721	—	17,122,859	6,465,534
Total governmental activities	<u>\$ 2,714,461,054</u>	<u>\$ 523,526,580</u>	<u>\$ (812,161,592)</u>	<u>\$ 2,425,826,042</u>	<u>\$ 282,903,218</u>

Accrued relocation costs represent expenditures to relocate displaced individuals and businesses resulting from eminent domain proceedings related to the South Mountain Freeway project. Such expenditures will be paid out over several years, and, therefore, are accrued as a long-term liability.

The Internal Service Fund predominantly serves the governmental funds. Accordingly, long-term liabilities for that fund are included as part of the above totals for governmental activities. At year-end, \$730 thousand of the Internal Service Fund's compensated absences is included in the above amounts.

Capital leases were removed from the financial statements in fiscal year 2019 due to materiality considerations.

Bonds and notes issued by the Department require compliance with a number of covenants. The Department believes that it is in compliance with all such covenants. In addition, certain of the Department's obligations are subject to Internal Revenue Service regulations pertaining to issuance of tax-exempt debt by governmental entities. The Department does not have and has not accrued a liability under these regulations.

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

F. Fund Balances

The fund balance classifications of the governmental funds as of June 30, 2020, were as follows:

6) Other Information

A. Loop 202 South Mountain Freeway Project

On February 26, 2016 the Department entered into a design-build-maintain contract with Connect 202 Partners (private partner) for the design, construction, and 30 year maintenance of the Loop 202 South Mountain Freeway totaling \$1.25 billion. The South Mountain Freeway is a 22 mile, 8 lane freeway that completes the Loop 202 and Loop 101 freeway system. This is the largest highway project in Arizona history. Pre-construction activities, including geotechnical, utility work, property acquisition and preparation began in spring 2015. Construction began in summer 2016. The freeway is now substantially complete and opened to traffic on December 21, 2019. The capital asset replacement and routine maintenance contract is for 30 years.

Cost and Funding Sources

The anticipated cost of this project is approximately \$2.0 billion, not including financing costs. Right-of-way cost estimates are not contractually committed, but are necessary costs to complete the project. The significant cost components of this project are as follows:

Developer Design and construction	\$	1,019,355,507
Construction Management, Other Utilities & Contingency		84,440,407
Preliminary engineering and right of way		586,408,525
Capital asset replacement (30-year Period)		128,720,443
Routine maintenance (30-year period)		208,810,234
Total anticipated cost of project	<u>\$</u>	<u>2,027,735,116</u>

Actual costs incurred by the Department through June 30, 2020 for this project is \$1,631,998,561. Anticipated funding for the Loop 202 South Mountain Freeway Project will be provided from the following sources (in millions). Estimates provided below are only for the costs associated with Construction, Design, and Right of Way of the South Mountain Freeway. Since the capital replacement and routine maintenance predominantly extended outside the RTPFP lifecycle, program fund source estimates are not included.

Regional Area Road Fund (1/2 - cent sales tax)	\$	393
Federal Funds		702
Regional Area Road Fund Bonds		295
Highway User Revenue Fund Bonds		120
State Highway User Revenue Funds		180
Total funding by source	<u>\$</u>	<u>1,690</u>

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

Maintenance Services – 30-Year Period

Upon completion of the construction phase of the project, Connect 202 Partners will maintain the freeway corridor for a period of 30 years. The average annual routine maintenance cost to the Department is approximately \$2,932,045. The actual amount paid to Connect 202 Partners in a given year will be escalated or reduced based on changes in the Consumer Price Index (CPI). Over the course of the 30 year maintenance period, Connect 202 Partners is expected to spend an additional \$103,192,057 on capital asset replacement. The actual amount paid to Connect 202 Partners in a given year will be escalated or reduced based on changes in the Construction Cost Index (CCI). The current estimates assume CCI at 3% and CPI 2% annually, actual CCI and CPI will vary, thus increasing or decreasing the routine asset and capital asset obligations for the contract.

June 30, 2020

B. Contingent Liabilities

Risk Management Insurance Losses

The Department is exposed to various risks of loss related to torts; thefts of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. The Department is a participant in the State's self-insurance program and, in the opinion of the Department's management, any unfavorable outcomes from these claims and actions would be covered by the self-insurance program. Accordingly, the Department has no risk of loss beyond adjustments to future years' premium payments to the State's self-insurance program. All estimated losses for unsettled claims and actions of the State are determined on an actuarial basis and are included in the State of Arizona's Comprehensive Annual Financial Report.

Claims

The Department has a variety of claims pending against it that arose during the normal course of its activities. Management of the Department believes, based on the advice of legal counsel, that losses, if any, resulting from settlement of these claims will not have a material effect on the financial position of the Department.

Grants

Amounts received or receivable from grant agencies are subject to audit and adjustment by grantor agencies, principally the federal government. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amount, if any, of expenditures which may be disallowed by the grantor cannot be determined at this time although the Department expects such amounts, if any, to be immaterial.

Light Rail Transit System

Arizona Revised Statutes, §28-9201, requires the Department to establish, implement, and enforce minimum safety standards for light rail transit systems. If a violation of the safety standards is discovered, the Department shall report the violation in writing to the Federal Transit Administration. Furthermore, the organization that operates a light rail transit system shall include a safety oversight function and pay the Department's costs resulting from administration.

C. Pension and Other Postemployment Benefits

Arizona State Retirement System

Plan Descriptions – Employees of the Department participate in the Arizona State Retirement System (ASRS). The ASRS administers a cost-sharing, multiple-employer defined benefit pension plan; a cost-sharing, multiple- employer defined benefit health insurance premium benefit (OPEB); and a cost-sharing, multiple-employer defined benefit long-term disability (OPEB). The Arizona State Retirement System Board governs the ASRS according to the provisions of A.R.S. Title 38, Chapter 5, Articles 2 and 2.1. The ASRS issues a publicly available financial report that includes its financial statements and required supplementary information. The report is available on its Web site at www.azasrs.gov.

Benefits Provided – The ASRS provides retirement, health insurance premium supplement, long-term disability, and survivor benefits. State statute establishes benefit terms. Retirement benefits are calculated on the basis of age, average monthly compensation, and service credit as follows:

	Retirement Initial Membership Date	
	Before July 1, 2011	On or after July 1, 2011
Years of service plus age required to receive benefit	Sum of credited service years plus age equals 80 10 years of credited service, at age 62 Any years, age 65	30 years, age 55 25 years, age 60 10 years, age 62 Any years, age 65
Average monthly compensation is based on	Highest 36 consecutive months of last 120 months-termination pay excluded	Highest 60 consecutive months of last 120 months-termination pay excluded
Benefit percent multiplier	2.1% to 2.3%	2.1% to 2.3%
Benefit percent multiplier is based on years of service	0-19.99 years of service 2.10% 20-24.99 years 2.15% 25-29.99 years 2.20% 30 or more years 2.30%	0-19.99 years of service 2.10% 20-24.99 years 2.15% 25-29.99 years 2.20% 30 or more years 2.30%

Retirement benefits for members who joined the ASRS prior to September 13, 2013, are subject to cost-of-living adjustments based on excess investment earnings, which are reserved for this purpose. Funds are reserved when total actuarial investment returns for each fiscal year are greater than 8%. If there are no excess investment earnings in the reserve, then no additional benefit increase is paid. As of June 30, 2019, there is a \$62.5 million balance in the reserve for future cost-of-living adjustments however, this amount will not create cost-of-living adjustments in the current year per the above statute. Pursuant to A.R.S. § 38-767, retired members with at least 10 years of service who have been retired five or more years are eligible for an enhanced cost-of-living increase. For each complete five-year period the member has been retired, an incremental benefit is paid if monies to pay the benefit are available. This benefit is funded by an interest credit of 8% of the reserve for future cost-of-living adjustments.

Members with a membership date on or after September 13, 2013, are not eligible for cost-of-living adjustments. Survivor benefits are payable upon a member’s death. For retired members, the retirement benefit option chosen determines the survival benefit. For all other members,

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

the beneficiary is entitled to the member's account balance that includes the member's contributions and employer's contributions, plus interest earned.

Contributions – In accordance with State statutes, annual actuarial valuations determine active member and employer contribution requirements. The combined active member and employer contribution rates are expected to finance the costs of benefits employees earn during the year, with an additional amount to finance any unfunded accrued liability. For the year ended June 30, 2020, active ASRS members were required by statute to contribute at the actuarially determined rate of 12.11% (11.94% for retirement and 0.17% for long-term disability) of the members' annual covered payroll, and the Department was required by statute to contribute at the actuarially determined rate of 12.11% (11.45% for retirement, 0.49% for the health insurance premium benefit, and 0.17% for long-term disability) of the active members' annual covered payroll. In addition, the Department was required by statute to contribute at the actuarially determined rate of 10.41% (10.29% for retirement, 0.05% for health insurance premium benefit, and 0.07% for long-term disability) of annual covered payroll of retired members who worked for the Department in positions that would typically be filled by an employee who contributes to the ASRS. The Department's contributions to the pension plan for the year ended June 30, 2020, were \$20,188,573.

During the fiscal year ended June 30, 2020, the Department paid for ASRS pension contributions as follows: 90% from the General Fund (State Highway Fund), 3% from major funds, and 7% from other non-major funds.

The Department's total covered payroll for fiscal year 2020 was \$176,319,415. The System is funded through payroll deductions from employees' gross earnings and amounts contributed by the Department. Retirement benefits, health care benefits, and long term disability benefits are obligations of the System and not of the Department. The Arizona Revised Statutes provide statutory authority for employee and employer contributions. The contribution requirement for fiscal year 2020 was \$20,188,573 each by both the employees and the Department, of which 100% was so contributed.

Presentation of Deferred Outflows and Deferred Inflows of Resources

Deferred outflows and inflows of resources are reported in the basic statements of net position in a separate section following assets and liabilities, respectively. The Department elected the optional statement of net position presentation.

The Department recognizes the consumption of net position that is applicable to a future reporting period as deferred outflows of resources. The deferred outflows of resources are related to the Department's pension plan.

The Department recognizes the acquisition of net position that is applicable to a future reporting period as deferred inflows of resources. The deferred inflows of resources relate to the Department's pension plan.

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

Retirement Plans

The Department contributes to the Arizona State Retirement System plan described below. The plan is a component unit of the State of Arizona. At June 30, 2020, the Department reported the following amounts related to the pension plan to which it contributes:

Statement of Net Position and Statement of Activities	Governmental Activities
Net pension liability	\$ 246,681,510
Deferred outflows of resources	25,687,671
Deferred inflows of resources	31,096,342
Pension expense	8,933,264

Changes in the Department's net pension liability during the fiscal year ended June 30, 2020, were as follows:

	Governmental Activities
Beginning balance	\$ 248,089,762
Increases	149,661,877
Decreases	(151,070,129)
Ending balance	<u>\$ 246,681,510</u>

Pension Liability – At June 30, 2020, the Department reported a liability of \$246.7 million for its proportionate share of the ASRS' net pension liability. The net pension liability was measured as of June 30, 2019. The total pension liability used to calculate the net pension liability was determined using update procedures to roll forward the total pension liability from an actuarial valuation as of June 30, 2018, to the measurement date of June 30, 2019 using generally accepted actuarial procedures.

The Department's reported liability at June 30, 2020, decreased by \$1.4 million from the prior year liability of \$248.1 million because of changes in the ASRS' net pension liability and the Department's proportionate share of that liability. The ASRS' publicly available financial report provides details on the change in the net pension liability.

The Department's proportion of the net pension liability was based on the Department's actual contributions to the plan relative to the total of all participating employers' contributions for the year ended June 30, 2019. The Department's proportion measured as of June 30, 2019, was 1.70%, which was a decrease of 0.08% from its proportion measured as of June 30, 2018.

The actuarial assumptions presented herein pertain to assumptions utilized for financial reporting requirements and differ from the assumptions utilized for funding purposes. The principal differences between the actuarial assumptions for financial reporting purposes and those utilized for funding purposes are the amortization methodology and valuation of assets. The actuarial assumptions were selected on the basis of an experience study which was performed for the five-year period ending June 30, 2016. The ASRS Board adopted the experience study which recommended changes, and those changes were effective as of the June 30, 2017 actuarial valuation.

Pension Expense and Deferred Outflows/Inflows of Resources – For the year ended June 30, 2020, the Department recognized pension expense from ASRS of \$8.9 million. This amount excludes current year contribution deferrals and the Department's internal change in

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

proportion. At June 30, 2020, the Department reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$ 4,456,367	\$ 46,378
Change in Assumptions	1,042,731	9,823,342
Difference between projected and actual earnings on pension plan investment earnings	—	5,544,548
Changes in proportion and differences between State contributions and proportionate	—	15,682,074
Contributions subsequent to the measurement date	20,188,573	—
Total	\$ 25,687,671	\$ 31,096,342

The \$20,188,573 reported as deferred outflows of resources related to ASRS pensions resulting from the Department contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2021 (measurement date June 30, 2021). Other amounts reported as deferred outflows of resources and deferred inflows of resources related to ASRS pensions will be recognized in pension expense as follows:

Year Ending June 30	Pension Expense
2021	\$ (15,585,463)
2022	(10,431,974)
2023	(1,064,788)
2024	1,484,981

Actuarial Assumptions – The significant actuarial assumptions used to measure the total pension liability are as follows:

Actuarial valuation date	6/30/2018
Actuarial roll forward date	6/30/2019
Actuarial cost method	Entry age normal
Asset valuation	Fair value
Investment rate of return (Discount Rate)	7.5%
Projected salary increases	2.7 - 7.2%
Inflation	2.3%
Permanent benefit increase	Included
Mortality rates	2017 SRA Scale U-MP

Actuarial assumptions used in the June 30, 2019, valuation was determined by an actuarial valuation as of June 30, 2018, and rolled forward using generally accepted actuarial procedures to June 30, 2019.

The long-term expected real return on ASRS pension plan investments was determined to be 5.45% using a building block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term contribution to expected real return by weighting the expected future real rates of return by the

Arizona Department of Transportation
Notes to the Financial Statements
June 30, 2020

target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of geometric real rates of return for each major asset class are summarized in the following table:

Asset Class	Target Asset Allocation Effective July 1, 2019	Real Return Geometric Basis	Long-Term Contribution to Expected Real Return
Equity	50%	6.09%	3.05%
Credit	20%	5.36%	1.07%
Interest Rate Sensitive Bonds	10%	1.62%	0.16%
Real estate	20%	5.85%	1.17%
Total	<u>100%</u>		<u>5.45%</u>

Discount Rate – The discount rate used to measure the ASRS total pension liability was 7.5%, which is greater than the long-term contribution to expected real return of 5.45%. The projection of cash flows used to determine the discount rate assumed that contributions from participating employers will be made based on the actuarially determined rates based on the ASRS Board’s funding policy, which establishes the contractually required rate under Arizona statutes. Based on those assumptions, the pension plan’s fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term contribution to expected real return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Sensitivity of the Department’s Proportionate Share of the ASRS Net Pension Liability to Changes in the Discount Rate – The following table presents the Department’s proportionate share of the net pension liability calculated using the discount rate of 7.5%, as well as what the Department’s proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower (6.5%) or 1 percentage point higher (8.5%) than the current rate.

	1% Decrease (6.50%)	Current Discount Rate (7.50%)	1% Increase (8.50%)
Proportionate share of the net pension liability	\$351,084,926	\$246,681,510	\$159,427,122

Pension Plan Fiduciary Net Position – Detailed information about the pension plan’s fiduciary net position is available in the separately issued ASRS financial report. The most recent report may be obtained by writing the Arizona State Retirement System, 3300 North Central Avenue, P.O. Box 33910, Phoenix, AZ 85067-3910, by calling (602) 240-2000 or (800) 621-3778 or visiting the website at www.azasrs.gov/content/annual-reports.

D. Accounting Changes

Government-wide Financial Statements

Government-wide net position has been restated as follows:

	<u>Governmental Activities</u>
Net position, as previously reported	\$ 21,671,944,652
Prior period adjustment	<u>(93,989,148)</u>
Net position, as restated	<u><u>\$ 21,577,955,504</u></u>

Prior Period Adjustment

Governmental activities beginning net position has been restated to reflect a change from amortizing bond premiums on a straight-line basis to the effective interest method. The change to the effective interest method was implemented to increase the accuracy of reported interest expense in the Statement of Activities, and to streamline amortization of bond premiums. Amortization amounts are derived directly from the bond pricing schedules for each bond issuance.

The accompanying note to required supplementary information is an integral part of this schedule.

Note to Required Supplementary Information

1. Budgets and Budgetary Accounting

An annual budget for the operating expenditures of the General Fund (State Highway Fund) is submitted to the governor in accordance with state law. The budget is legally enacted as appropriations after approval by the state legislature and signature of the governor. The legal level of control for operating expenditures is set at the agency level and expenditure budgets are appropriated using a lump-sum by agency format. Revenue budgets are developed internally by the Department and are not part of the appropriation process.

Amendments to the approved appropriations require legislative approval. However, since the Department's appropriation is a lump sum appropriation by agency, the allocation of funds between personal services, employee-related expenditures, and other operating expenditures is an internal decision. Accordingly, transfers between line items such as personal services and other operating expenditures within a particular program may be made by the program manager. Expenditures may not exceed appropriations. All transfers of funds are reported to the Department's Office of Strategic Planning and Budgeting for monitoring purposes.

Budgets are prepared on the cash basis except that liabilities incurred before the end of the fiscal year and paid within the first month of the subsequent fiscal year are charged against the prior fiscal year's budget. The Department's appropriations lapse at fiscal year-end unless exempted by the legislature.

For financial reporting purposes, the accompanying financial statements present the legally adopted budget for the operations of the General Fund (State Highway Fund) that is subject to legislative appropriation.

In addition, budgets for capital outlay, including land, building, and improvements for the General Fund (State Highway Fund) and State Aviation Fund, are also submitted to the governor in accordance with state law. The capital outlay appropriation includes state highway construction and land, building, and improvements for the General Fund (State Highway Fund). A legal limitation is adopted for land, building, and improvements; however, legislation allows the Department to spend in excess of its appropriation for state highway construction up to the current fund balance. The Department monitors expenditures through an internal budgetary process and the Five-Year Transportation Facilities Construction Program approved by the Transportation Board.

Information About Infrastructure Assets Reported Using the Modified Approach

As allowed by Governmental Accounting Standards Board Statement No. 34, *Basic Financial Statements – and Management’s Discussion and Analysis – for State and Local Governments* (GASB 34), as amended, the Arizona Department of Transportation (the “Department”) reports its roads and bridges using the modified approach. Assets accounted for under the modified approach include 6,822 center line miles (21,532 travel lane miles) of roads and 4,900 bridges that the Department is responsible to maintain.

In order to utilize the modified approach, the Department is required to:

- Maintain an asset management system that includes an up to date inventory of eligible infrastructure assets.
- Perform condition assessments of eligible assets and summarize the results using a measurement scale.
- Estimate each year the annual amount to maintain and preserve the assets at the condition level established and disclosed by the Department.
- Document that the assets are being preserved approximately at or above the established condition level.

As adopted by the Transportation Board of the State of Arizona Department of Transportation (the “Transportation Board”) on an annual basis, the Five-Year Transportation Facilities Construction Program (the “Program”) contains estimated expenditures for highway system improvements and the preservation of existing roadway and bridges. Both of these factors impact the condition assessment of the roads and bridges as described in the following sections. The Program in effect for fiscal year 2020 and beyond was adopted by the Transportation Board on June 16, 2017.

This Program is a dynamic instrument and adjustments are made to the annual plans based on the needs of the Department to maintain the condition level of the roads and bridges at a level equal to, or greater than, the goals established by the Department. In addition, not only are adjustments made during the life of the Program, circumstances may require that refinements to the individual components of the Program be made during the fiscal year.

In comparing Estimated to Actual Expenditures in the tables that follow, significant variances can occur. These variances are primarily due to the methodology used in the preparation of the Program. In this Program, the Estimated Expenditures for the current year are based on “programmed” projects which may or may not be spent in the current year of the Program. Programmed expenditures consist of those items that are planned for the future, with contracts that have not yet been awarded. Furthermore, the Actual Expenditures will include projects that were programmed for a prior year’s Estimated Expenditures, but which did not occur, or were not completed, in the prior year.

The following information pertains to the condition assessment and maintenance of infrastructure assets and reflects the Department’s success in achieving condition levels that exceed the established levels.

Arizona Department of Transportation
Required Supplementary Information
June 30, 2020

Roads

The mission of the Department’s Pavement Management Section (PMS) is to develop and provide a cost effective pavement rehabilitation construction program that preserves the state’s investment in its highway system and enhances public transportation and safety. The requirements of GASB 34 and the PMS both work toward the same basic goal, the efficient, effective management of the Department’s assets to produce long-term benefits while minimizing expenditures.

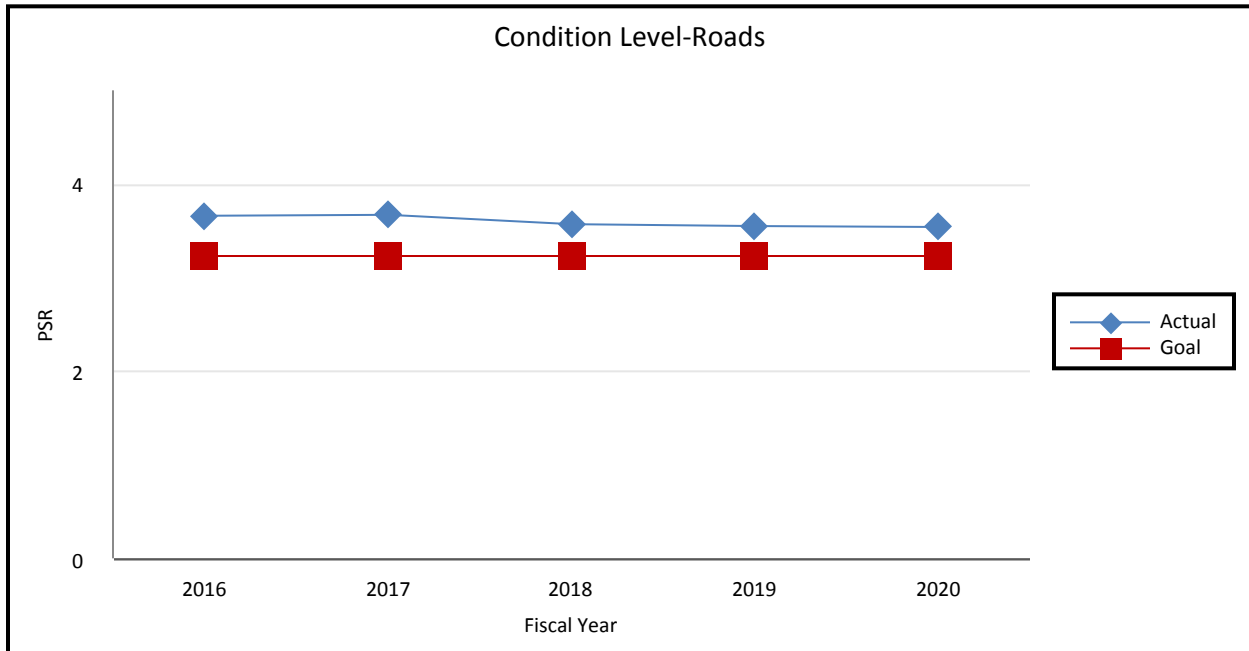

The PMS has developed performance goals for the condition level of the pavement in the state highway system. These goals require periodic assessment of pavement conditions and the budget level needed to meet that goal. The goal is expressed as a measure called “Serviceability” which can be defined as the ability of a pavement to serve the traveling public (as documented in 1961 after American Association of State Highway and Transportation Officials (AASHTO) Road Test, 1956-1961). Serviceability is based on detailed measurements of objective features of the pavement. Many surveys since the original road test have shown that these measurements closely track the subjective opinion of the traveling public. Most commonly, this number is called Present Serviceability Rating and abbreviated as PSR. PSR is a five-point scale (5 excellent, 0 impassable), similar to the Weaver/AASHTO Scale shown as follows:

Numerical Rating	PSR	Weaver/AASHTO Scale
5	Excellent	Perfect
4	Good	Very Good
3	Fair	Good
2	Poor	Fair
1	Very Poor	Poor
0	Impassable	Very Poor

The goal of the Department is to maintain a condition level (PSR) rating of 3.23 or better for all roads in the state highway system. Annually, Transportation Material Technicians drive over the system with inertial profiling equipment and measure the roughness of the pavement. This process is continuous throughout the year in order to assess the condition level of all pavement on an annual basis. As of the end of fiscal year 2020, an overall rating of 3.54 was achieved, as shown in the following graph:

Arizona Department of Transportation
Required Supplementary Information
June 30, 2020

Figure 1

Preservation of the roads is accomplished through programs managed primarily by the Department’s PMS, as well as other units within the Department. The estimated (as specified in the Program as programmed amounts) and actual expenditures for fiscal years 2016 through 2020 were as follows:

Fiscal Year	Estimated Expenditures (in millions)	Actual Expenditures (in millions)
2016	\$272.0	\$300.6
2017	\$322.4	\$317.0
2018	\$375.0	\$186.4
2019	\$364.6	\$218.0
2020	\$509.0	\$294.0

Arizona Department of Transportation
Required Supplementary Information
June 30, 2020

Bridges

The Department's bridge assets constitute a significant portion of all infrastructure assets in Arizona. As of June 30, 2020, the Department owned and maintained 4,900 bridges with an approximate total deck area of 42,745,510 square feet. Bridges, for purposes of this report, include all structures erected over an opening or depression with a centerline of 20 feet or more. Information related to these bridges is stored and updated in AASHTOWare™ Bridge Management software (BrM). This system is used to efficiently manage the bridge inventory through storing all bridge related data and assisting bridge engineers in arriving at appropriate bridge preservation decisions. Also, BrM is used for reporting bridge inventory and condition, on an annual basis, to the Federal Highway Administration (FHWA).

Historically, a Condition Rating Index (CRI) has been used to track the condition of the bridge network. The CRI was based on four selected bridge inspection condition ratings, which in turn were based on standards established in the FHWA's "Recording and Coding Guide for the Structural Inventory of the Nation's Bridges."

In 2015, FHWA issued new rules which have had the effect of replacing CRI as the summary statistic for bridge condition. Instead, the Departments of Transportation of the various States are expected to maintain their bridges so that no more than 10% are classified as Poor. Financial sanctions are held against States that do not comply with this standard. Management of the bridge inventory is a major function of the Department's Bridge Group and regularly scheduled biennial inspections are made of all bridges. A civil or structural engineer, licensed to practice in Arizona, performs these inspections. In fiscal year 2020, 0.9% of bridges maintained by the Department were classified as Poor.

Bridges represent a major public investment, and their inspection and maintenance is an essential function of the Department in its mission of providing products and services for a safe, efficient, and cost effective transportation system. Figure 2 indicates that approximately 73% of the bridges in the state were constructed in 1980 and prior while only 27% have been constructed after 1980.

Arizona Department of Transportation
Required Supplementary Information
June 30, 2020

Figure 2

Each bar represents the percentage of bridges built in corresponding decade.

Preservation of the bridges is accomplished through programs managed by the Bridge Group. The estimated (as specified in the Program as programmed amounts) and actual expenditures for fiscal years 2016 through 2020 were as follows:

Fiscal Year	Estimated Expenditures (in millions)	Actual Expenditures (in millions)
2016	\$11.6	\$39.8
2017	\$28.8	\$23.4
2018	\$26.4	\$15.3
2019	\$28.1	\$17.8
2020	\$20.1	\$11.6

Contributions as a percentage of covered payroll	11.45%	11.18%	10.90%	10.78%	10.85%	10.89%

(1) The Department implemented GASB 68 in fiscal year 2015. Therefore, ten years of data is not available, but will be accumulated over time.

SUPPLEMENTARY INFORMATION

NONMAJOR GOVERNMENTAL FUNDS

FINANCIAL STATEMENTS

SPECIAL REVENUE FUNDS

Special revenue funds are used to account for specific revenues that are legally restricted to expenditures for particular purposes.

The State Aviation Fund is appropriated by the legislature and receives monies from aviation gasoline taxes, sale of abandoned or seized aircraft, flight property taxes, and the operation of the Grand Canyon National Park Airport. The State Aviation Fund monies are used to build and maintain airport facilities throughout Arizona.

The Safety Enforcement and Transportation Infrastructure Fund is appropriated by the legislature and receives monies from registration fees for non-resident vehicles and single trip and limited use fuel tax permits. Monies are used for enforcement of vehicle safety requirements, and construction and maintenance of transportation facilities within twenty-five miles of the border between Arizona and Mexico.

The Motor Vehicle Liability Insurance Enforcement Fund is appropriated by the legislature and receives reinstatement fees for insurance-related driver license and vehicle registration suspensions. Monies are used to administer the State's Mandatory Liability Insurance Program.

The Motor Vehicle Inspection and Title Enforcement Fund is appropriated by the legislature and receives monies from the fees charged for certain vehicle inspections. Monies are used to defray the cost of investigations involving certificates of title, licensing fraud, registration enforcement, and other enforcement related issues.

The Motor Carrier Safety Revolving Fund receives fees to administer and enforce the rules governing the safety operations of motor carriers, shippers, and vehicles transporting hazardous materials, substances, or waste.

The Economic Strength Project Fund receives monies from the Highway User Revenue Fund for use on approved economic strength projects recommended by the Arizona Commerce Authority and Economic Development Commission.

The Grant Anticipation Notes Fund receives revenues from the Federal Highway Administration under various grant agreements for the repayment of Grant Anticipation Notes (GARVEE bonds).

The Local Agency Deposits Fund receives monies from the U.S. Government and local agencies for the payment of local agency sponsored county secondary road construction projects.

**Arizona Department of Transportation
Overview — Statistical Section
For the Year Ended June 30, 2020**

This part of the Arizona Department of Transportation’s (the “Department”) Comprehensive Annual Financial Report provides detail in the form of graphs and tables intended to assist the reader of the report with understanding the information presented in the financial statements, note disclosures, and required supplementary information regarding the overall financial health of the Department.

Financial Trends

These schedules show trend information that gives an insight into the Department’s financial well-being and performance over time.

Revenue Capacity

Information about the Motor Vehicle Fuel Tax and the Highway User Revenue Fund, the Department’s most significant own-source revenues, is presented in these tables.

Debt Capacity

These tables present information to help the reader assess the affordability of the Department’s current levels of outstanding debt as well as the Department’s ability to issue additional debt in the future.

Demographic and Economic Information

The demographic and economic indicators presented in this section offer an understanding of the environment in which the Department’s financial activities take place.

Operating Information

The Department’s relationship of the financial report to the services provided as well as its activities is illustrated in these tables depicting service and infrastructure information.

Sources: Unless otherwise stated, all information in the following tables is derived from the Comprehensive Annual Financial Reports for the years shown.

The Highway User Revenue Fund receives certain Motor Vehicle Division revenues from the Motor Vehicle Division Clearing Fund. These monies are distributed: 50.5% to the State Highway Fund, 27.5% to cities and towns, 3% to cities with population over 300,000, and 19% to counties based on Arizona Revised Statutes – Section 28-6538.

¹An appropriation for Arizona State Parks is included. Fiscal years 2009, 2010, 2011 and 2012 include distributions to the State General Fund.

²Legislation passed in April 2018 (Chapter 265, HB2166), created a new funding source for the Department of Public Safety (DPS) to be started after December 31, 2018. This new funding source, called the Highway Safety Fee, created an additional \$32 fee to be added to new plate registrations and renewals (\$5 for motorcycles) in order to fully fund the DPS budget. Therefore, the distributions through the HURF fund were eliminated and this separate source implemented beginning in January, 2019.

SOURCES:

U.S. Bureau of Economic Analysis (for population, personal income, and per capita personal income figures);
U.S. Bureau of the Census (also for population) population data only available through 2019.

NOTE:

¹The Arizona population data are midyear population estimates of the U.S. Bureau of the Census. Year 2009 has been revised to reflect revisions made by the U.S. Bureau of the Census. Per capital personal income is total personal income divided by total midyear population estimates of the U.S. Bureau of the Census. Previous years have been revised to reflect revisions in personal income and population estimates.

²Pension and OPEB liabilities were reported for the first time in fiscal year 2017 due to implementation of GASB 68 and allocation of OPEB from the Arizona Department of Administration beginning in fiscal year 2016.
