

ITEM – MICRO-SURFACING*Note to C&S:*

*This specification is to be used in conjunction with Stored Specifications "1001MATL" and "104ENVIR". Stored Specification "404BITUM" shall **not** be used in conjunction with Micro-Surfacing.*

The Micro-Surfacing shall be as specified in Contracts and Specifications Stored Spec. "404MICRO".

The gradation of the mineral aggregate shall be Type *.

DESIGNER:

- * Specify whether the mineral aggregate gradation shall be "Type II" or "Type III". Consult with the Pavement Design Engineer prior to specifying the gradation type.

Estimated quantities for emulsified asphalt and dry mineral aggregate shall be based on Table 1 in "404MICRO", as shown below:

TABLE 1		
Material	Type II Micro-Surfacing	Type III Micro-Surfacing
Emulsified Asphalt, by weight of Dry Mineral Aggregate, percent	14	13
Dry Mineral Aggregate, pounds per square yard	22	30
