

If you are using Google Chrome or Microsoft Edge and the links are not working, it is probably due the Adobe Acrobat extension. To fix it:

In the top right hand corner of Google Chrome or Microsoft Edge Click on the extension icon (looks like a puzzle piece). Circled in red in the picture below.

Then click on **the three vertical dots** next to the Adobe Acrobat extension and choose either **Options** for Chrome or **Extension Options** for Edge.

In Adobe Acrobat Options, **turn off the Open PDFs in Acrobat option** (move the circle to the left or switch from blue to white) and **Save Preferences**
