GENERAL NOTES

1. The control height for guardrail system is 31" to the top of rail, measured at the face of rail from the normal finished shoulder elevation.

2. Guardrail shall be lapped to the direction of adjacent traffic.

3. Wood blockouts may be one 12" deep blockout, or a combination of one 8" deep blockout and one 4" deep blockout (POB18). If two blockouts are used, they must be nailed together by two 16d galvanized nails.

5. Maintain a distance of 50" between w-beam face and rigid objects.

- Use 6" maximum curb height.
- Default value is 0'. May vary up to 7' if shown on plans or directed by the Engineer.
- An additional 3/8" diameter hole may be provided at the same location on the opposite side of web.
- The 1/4" diameter hole may be eliminated when composite or routed wood blockouts are installed.

BLOCKOUT DETAIL

- 1/4" Diameter Hole
- 1/2" Diameter Hole
