GENERAL NOTES

1. Material for shoulder transition shall be placed to the finished roadway elevation for the entire length of the transition. When the roadway is paved, aggregate subbase or A-3 shall be used. When the roadway is unpaved, a material equivalent to the existing roadway shall be used.

2. On steeper grades, the post shall be installed plumb to align with adjacent paving. The brace assembly may be modified as necessary to support the post.

- Indicates AASHTO, AASCA & ARTBA Task Force 13 designation
