GENERAL NOTES

1. Median Barrier shall be constructed by the slip form or formed cast-in-place method.

2. When obstructions prevent the use of slip form equipment, stationary forms shall be used.

3. Concrete shall be Class S, f/c=4000 PSI.

4. If the footing and barrier are cast monolithically, #6 S shape rebars are not required.

5. Barrier width shall not exceed the barrier footing width nor overhang the adjacent pavement.

6. #4 Rebar shall extend 1/2" past the construction joint at the completion of the day’s pour.

    ▲ Depth to match adjacent PCPP thickness.
    ▼ Footing depth shall match adjacent PCPP thickness and shall consist of either
        a) full-depth concrete, or
        b) 8" concrete over compacted AB (Class 2).

See Special Provisions for measurement and payment.
