Subject: Roadway Construction Standard Drawings Update

The following Roadway Construction Standard Drawings have been updated and are available for download at the Roadway Design website

<http://www.azdot.gov/highways/RdwyEng/RoadwayDesign/ViewableDrawings.asp>

C-05.50: added Detectable Warning Strip to Sections A - A and C - C and PLAN view

- C-07.02: added "mainline" in General Note 1
- C-10.54, Sht 1: added concrete cap to Section A - A and revised General Note 3
- C-10.54, Sht 2: added concrete cap to Section A - A and modified callout in Section B - B
- C-10.55, Sht 1: added concrete cap to Section A - A, modified callout in Section B - B, and revised General Note 4
- C-10.54, Sht 2: added concrete cap to Section A - A and modified callout in Section B - B

Design personnel should implement the updated drawings and incorporate them into their project plans. For projects at or near completion, where the inclusion of all new standard drawings is not practical, the 1A Sheet must accurately reflect the correct revision dates for the design. Construction personnel should review the drawing revisions for possible implementation on construction projects.

Please distribute this e-mail to all users within your Group, Section, or District, and arrange for printing of the updated Standard Drawings for those without computer access. Copies of the complete set of Roadway Construction Standard Drawings (either 8-1/2" x 11" or 11" x 17") may be obtained from Engineering Records located at 1655 West Jackson, Room 175, Phoenix, AZ 85007-3217 or by telephoning 602-712-8216.

The updated Construction Standards Index (1A Sheet) is also available on-line at the address shown above.

Please contact me if you have any questions or comments regarding the updated standard drawings.

Bob -

Please post to web under Design E-Mail Notifications. Thanks. ken
