**NOTES:**

1. Conduit size and location shall be as shown on the plans.
2. SEE ADOT STD Dwg B-2130 for additional information.
3. See structural plans for barrier details and reinforcing.
4. Cover plates shall have "ADOT ELECTRICAL HIGH VOLTAGE" in 1" letters.
5. The junction box shall be fabricated from sheet steel conforming to ASTM Standard. The sheet steel shall be bent and/or welded at corners to provide a complete and tight enclosure. Suitable openings shall be provided for entrance of electrical conduit and shall be effectively sealed by an approved method. The entire assembly shall be such as to prevent leakage into the box.
6. All frame and cover plates shall be of steel conforming with ASTM Standards.
7. All steel items shall be hot-dip galvanized after fabrication in accordance with ASTM Standards.
9. The neoprene gasket shall be continuous around cover plate space and secured to the frame.
10. Junction boxes and expansion couplings shall be approved by the Engineer prior to ordering.
11. Conduit knock-outs per construction plans.
12. Conduit connections to junction box shall be with threaded connectors.
13. Metallic boxes shall be bonded in an approved manner.
