NOTES:
1. All service conductors and service switches shall be 100 amp. capacity.
2. All components on 120/240 volt circuits shall be rated for 600 volt operation. All other components shall be rated for 250 volt operation.
3. Typical component installations are shown, leave space for future component installation.
4. See T.S. 3-12 for details on Pan and Jack Mounted Components.
5. All components shall be interior mounted.
6. All line electrical components shall be protected by a dead-front panel which conforms to the NEC, see specifications.
