NOTES:
1. All materials and construction shall conform to the requirements of the Specifications.
2. See T.S. 4-23 for anchor bolt detail.
3. The foundation hole shall be augered and filled with a "C" class (3000 PSI) concrete, poured against undisturbed compacted earth.
5. A 25' coil of "A" AWG bare copper conductor or 4" square copper ground plate shall be installed before the concrete is poured and connected to pole grounding lug in the hand hole. The ground or coil shall be covered with 6" of fill.
6. See T.S. II Series for push button details.
7. See T.S. 4-22 for push button pole drilling details.
8. All dimensions are nominal.
9. Once the pole installation is completed the open space between the base plate and foundation shall be grounded.
10. The top of the foundation shall be flush with the surface of the adjacent ramp or sidewalk. See Construction Standard Drawing CS-30.
