NOTES:

1. All materials and construction shall conform to the requirements of the Standard Specifications.

2. The foundation hole shall be framed and Class "S" (3000 psi) concrete poured against undisturbed compacted earth.

4. A 25 ft coil of #6 AWG bare copper conductor on a 4 inch square copper ground plate shall be installed before the concrete is poured and connected to the pole grounding lug in the hand hole. The ground coil shall be covered with 6 inches of fill.

5. See Std Dwg T.S. 4-21 for push button details.

6. See Std Dwg T.S. 4-21 for push button pole drilling details.

7. Once the pole installation is completed, the open space between the base plate and foundation shall be grouted.

8. The top of the foundation shall be flush with the surface of the adjacent ramp or sidewalk. See Construction Standard Drawing CS-30.

9. All dimensions are nominal.
