NOTES:

1. All materials and construction shall conform to the requirements of the Standard Specifications.

2. Anchor bolts shall be 1" x 36", with two hex nuts and two flat washers per bolt.

3. Anchor bolts shall project 2½" above the foundation.

4. Block out for leveling nuts.

5. Unstable soil may require deeper foundation. See Standard Specifications. Concrete shall be CLASS "S" (3000 psi).

6. A 25' coil of No. 4 AWG bare copper conductor shall be installed before the concrete is poured and connected to an anchor bolt.

7. Cabinet shall be bolted to the mounting brackets with 4 - 3½" x 13½" x 16 grade 8 bolts with lock washers and oversized fender washers.

8. Install a PCC pad, 3' x 3' x 3' deep. Slope pad away from foundation.

9. For the Type III cabinet, install four (4) Clinch Type [4].

10. Pole base plate and anchor bolts shall be per T.S. 4-1 and 4-22. Type A pole.

11. Conduit shall run from the base through the inside of the Type A pole and terminate through an installed hole from the pole into the cabinet.
