NOTES:
1. All materials and construction shall conform to the requirements of the Standard Specifications.

2. The foundation hole shall be formed and filled with concrete poured against undisturbed compacted earth.

4. A 25 ft coil of 1⁄4 AWG bare copper conductor or a 14 inch square copper ground plate shall be installed before the concrete is poured and connected under one of the nuts of the connecting bolts. The ground plate shall be covered with 6 inches of fill.

5. See Std Dwg T.S. 1 Series for push button details.

6. See Std Dwg T.S. 4-22 for push button pole details.

7. Once the pole installation is completed the open space between the base plate and foundation shall be grouted.

8. The top of the foundation shall be flush with the surface of the adjacent ramp, curb or sidewalk. See Construction Standard Drawing C-05.30.

9. All dimensions are nominal.
