NOTES:
1. All service conductors and service switches shall be 125 Amp capacity.
2. All components on 240/480 volt circuits shall be rated for 600 volt operation. All other components shall be rated for 250 volt operation.
3. Typical component installations are shown. Omit individual components not required, but leave space for future component installation.
5. See T.S. 3-4 for Type III Load Center Cabinet and Foundation Details.
6. All components shall be interior mounted.
7. The contractor shall consult with the Utility Co. to establish and install the proper ampere interruption capacity breakers for each individual installation.
8. All live electrical components shall be protected by a dead-front panel which conforms to the NEC, see specifications.
