1. Dimensions are measured to the center of all striping unless noted otherwise.
2. RPMs should be installed on elevations below 4000 ft.
3. Type "C" reflective pavement markers are to be placed at 20 ft, spacing, and offset 2 inches from the edge of the gore stripe.
4. Unless otherwise shown on the project plans, all gore markings statewide shall use durable tape for lane lines, exit gore, and gore lane symbols of the gore stripe. When used above elevations of 4000 ft, durable tape shall be installed in a groove per manufacturer's recommendations.
5. Optional second arrow can be installed at half the distance between the first arrow and the last strip line in the acceleration lane. If that distance is 500 ft or more.
