Glossary

ADOT – Arizona Department of Transportation

BECO – Business Engagement and Compliance

CARF – Computer Access Request Form

Goal Request – The entire request submitted by the Goal Requestor comprised of the Goal Worksheet and the Work Category Page

Goal Requestor – The person submitting the Goal Request

Goal Worksheet – The page where the project information about the Goal Request is provided

LPA – Local Public Agency

Work Category Page – The page where the project work category information for the Goal Request is provided

BECO Goal Setting Application

Goal Request Workflow

07/2020

NOTE: Only Goal Requests that are FHWA funded need to be submitted by requestor

ADOT goal requester navigates to the internal goal setting webSite and is authenticated automatically using windows credentials

username and password

- System Generated Email Sent
- Start/End
- Goal Requestor Step
- BECOS Step
- System Step
- Status Change

Once saved, the Goal Request shows upon dashboard and is in the "Draft" status

If the Goal Request remains in draft or "In-Process" status for 120 calendar days, it will auto-delete [with two warning emails to the requester prior to doing so].

Goal Request changes to "Submitted" status

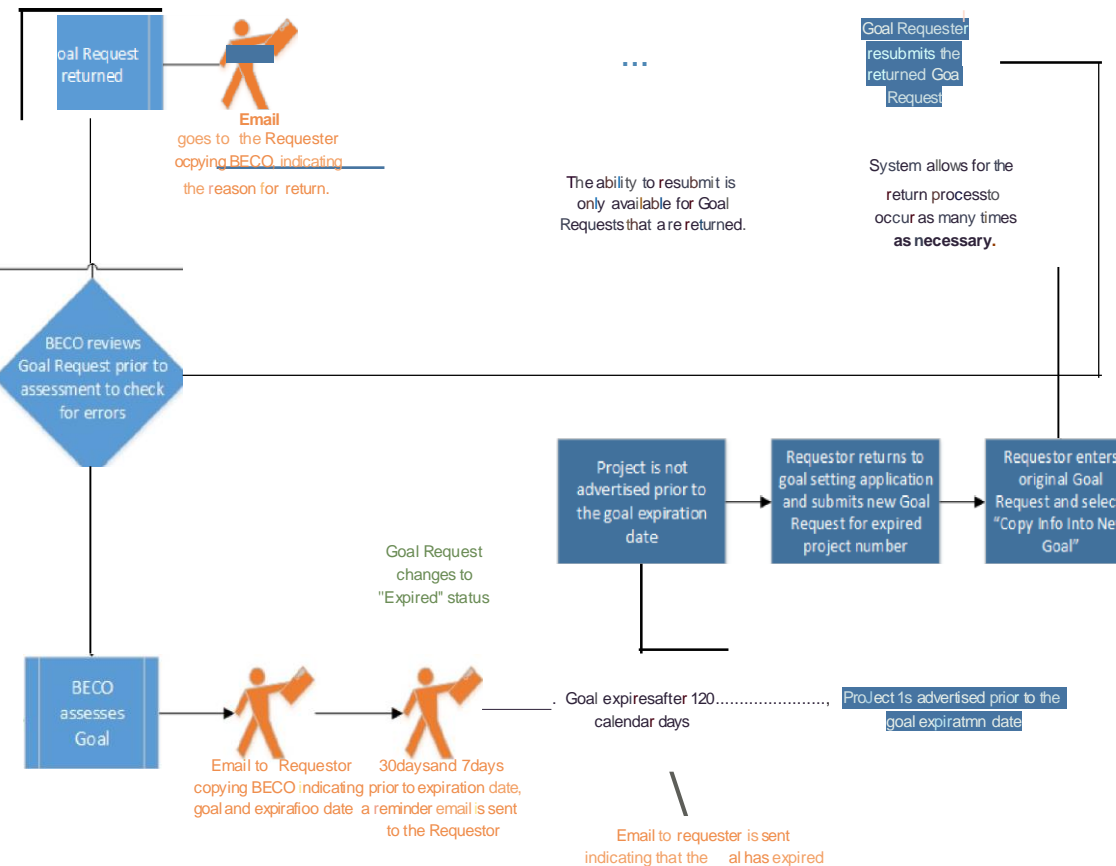

This draft can be returned to and picked up by any goal requester from the same agency or group and submitted at any time. The individual that created the original request will remain the requestor.

Once submitted, another Goal Request for the same project number cannot be submitted if there is a goal associated with it in the assessment stage. The project number can be reused/resubmitted only if the goal status is "rejected" or "expired"

Goal Request changes to "Returned" status

Goal Request changes to "Approved" status

This Goal Request changes to "Resubmitted" status

Creating and Accessing Your Account

ADOT Goal Requestors

As an ADOT Goal Requestor, if you already have access to the system, you will navigate to the [internal Goal Setting Application](#) page and will be authenticated (i.e., logged in) automatically.

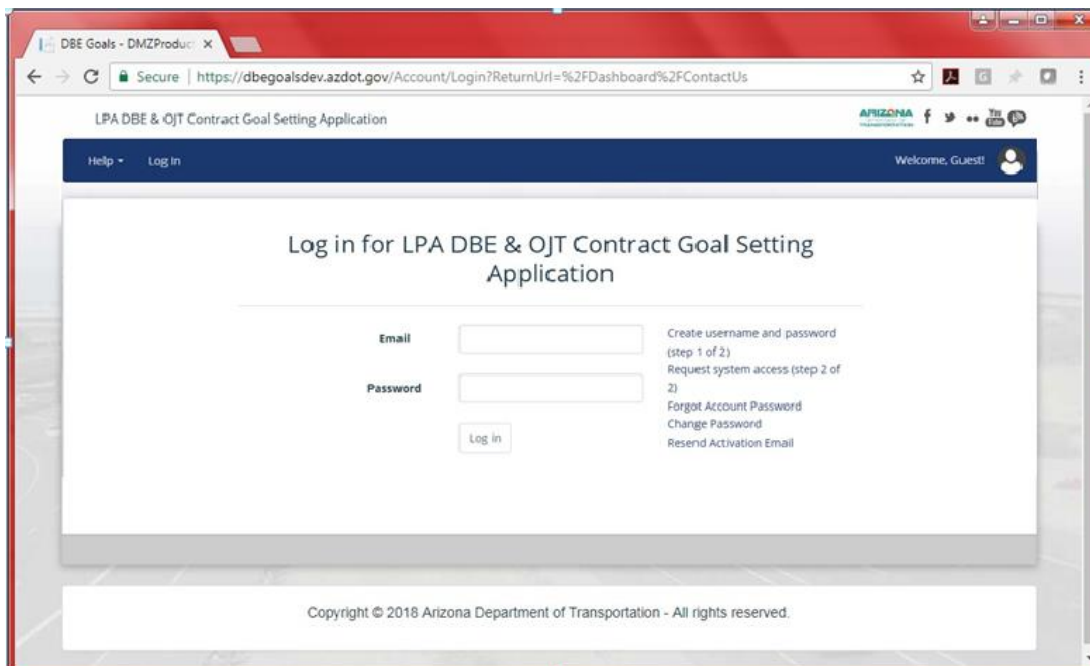

If you do not have access to the Goal Setting application yet, you should submit a ticket to the service desk by either calling (602) 712-7249 or using the self-service, [service desk portal](#) and ask for access to the BECO Goal Setting Application with a “User” role. A [CARF](#) is required. You should allow for up to five (5) business days to receive access after you submit a CARF, depending on whether the CARF is submitted and approved by the appropriate supervisor in a timely manner.

Local Public Agency Goal Requestors

As an LPA Goal Requestor, if you already have access to the system, you will navigate to the [external Goal Setting Application](#) page and use the credentials you created to log in.

If you do not have an account, you will navigate to the [external Goal Setting Application](#) page, click on the “[Register As New User](#)” link, fill out the form, and follow the step-by-step instructions. You must activate your account via email as soon as you create your login and password. If you do not activate your account within 48 hours using the email sent to you during the registration process, you will need to request a new Activation Email. This step completes the account creation process. See [Resend Activation Email](#) for further instructions if you did not activate your account within 48 hours.

Once you establish your log in credentials, you will need to complete and submit the [LPA DBE Goal Access](#) Request Form to obtain the appropriate access within the DBE & OJT Contract Setting Application.. You should allow for up to five (5) business days to receive access after you contact us, if the appropriate information is provided in the original request.

The screenshot shows a web browser window with the URL <https://dbegoalsdev.azdot.gov/Account/Login?ReturnUrl=%2FDashboard%2FContactUs>. The page title is "LPA DBE & OJT Contract Goal Setting Application". The main heading is "Log in for LPA DBE & OJT Contract Goal Setting Application". There are two input fields: "Email" and "Password". Below the "Password" field is a "Log in" button. To the right of the input fields, there is a list of links: "Create username and password (step 1 of 2)", "Request system access (step 2 of 2)", "Forgot Account Password", "Change Password", and "Resend Activation Email". The page also includes a "Help" link and a "Log In" link in the top navigation bar. The footer text reads "Copyright © 2018 Arizona Department of Transportation - All rights reserved."

Trouble Shooting Error Messages

If you requested access and received an email stating you have access but every time you try to log in you get an error message try manually typing in your user name and password.

Using autofill and other prompted fill in responses sometimes contain extra spaces that cannot be seen. You can also try changing your password by following the instructions below.

Change Your Password

To change your password, navigate to the [external Goal Setting Application](#) page and click “Change Password” and follow the on screen instructions.

Forgot Your Password

If you forgot your password, navigate to the [external Goal Setting Application](#) page and click “Forgot Account Password” and follow the on screen instructions.

Resend Activation Email

If you did not click on the link in your registration validation email within 48 hours of creating your credentials, navigate to the [external Goal Setting Application](#) page, click “Resend Activation Email” and follow the on screen instructions.

Navigate the Main Menu

The Main Menu is located at the top of the page, regardless of which page you are on in the application. The Main Menu consists of the:

- “Home” button which takes you to your Dashboard which consists of all goals initiated by you and anyone in the agency or group that you are a part of.
- “Print Blank Goal” dropdown menu which gives you the option to download a blank goal for the three types of Goal Worksheets.
- “Create A New Goal” dropdown menu which gives you the option to start any of the three types of Goal Worksheets.
- “Help” dropdown menu which includes the User Manual and a Contact Us section for BECO.
- “Log Out” button that is applicable to LPA’s using the external application only. This button will log you out of the application.

Navigate the Dashboard

Your dashboard consists of a list of all Goal Requests initiated by you and all other goal requestors within your same agency or group. Goal Requests can be searched for by Project Number or by Requestor. Because you share your dashboard with all of the other requestors within your same agency or group, Goal Requests can be picked up by any goal requestor in your agency or group and can be updated or submitted by them at any time.

To run a search, select the Project Number and/or the Requestor Name and click “Search”

Create a Goal Request

Note: Only FHWA funded contracts need to be submitted through the goal setting application.

Goal Worksheet

From any screen, click on the “Create A New Goal” dropdown on the Main Menu at the top of the page and select the type of Goal Worksheet that you would like to start.

Goal Worksheet Types

Choose your goal worksheet carefully. If you submit a Goal Request on the incorrect worksheet you cannot copy the information to another worksheet type. If you are unsure, contact BECO. BECO’s contact information is provided in the Main Menu under the “Help” dropdown.

- “Construction” is the worksheet for construction projects
- “Planning/Engineering Design/Other Professional Services” is the worksheet for Engineering Design, Planning, or Professional Services projects
- “Combined (Both Worksheets)” is the worksheet for projects that have both construction and design components.
 - If you feel you need to submit a “Combined” worksheet, contact BECO prior to submitting your request. BECO’s contact information is provided in the Main Menu under the “Help” dropdown.

Once you select your worksheet type, the proper Goal Request will generate. The worksheet header will indicate the type of worksheet that you chose at the top of the page.

Select the ADOT Project Number that you would like to submit for a Goal Request for by either scrolling through the ADOT Project Number dropdown menu or by typing within the ADOT Project Number field as shown below. If your project number is not listed, see the [Request to Add a Project Number](#) section of this document.

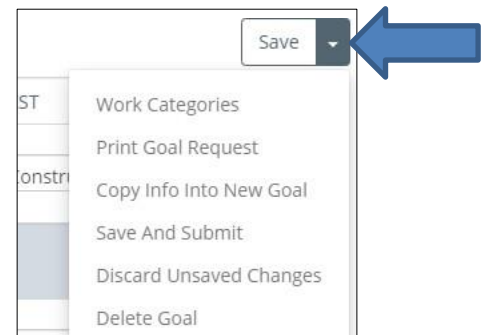

Planning/Engineering Design/Other Prof Services Worksheet

ADOT Project Number	<div style="border: 1px solid #ccc; padding: 2px;"> Select ADOT Project/... <div style="border: 1px solid #ccc; padding: 2px; margin-top: 2px;"> Add ADOT Project/TRACS No. F007201C </div> </div>	Contract/Agreement Number	<div style="border: 1px solid #ccc; height: 20px;"></div>
Project Type		Contract Work Type	<div style="border: 1px solid #ccc; padding: 2px;">Select Contract</div>
Project Title			

Once you have selected your project number, complete Contract/Agreement Number, Project Type, Contract Work Type and Project Title. Once you have completed those sections, save the Goal Worksheet. Saving will open the rest of the Goal Worksheet and create a Draft that will show up on your dashboard.

Once your Goal Worksheet is saved and the rest of the worksheet is opened, the Save button will show an additional dropdown menu which will provide various other options, such as

- “Work Categories”, the second component to your Goal Request. It includes a page of work categories based on the type of Goal Worksheet selected. This page is where you break down the components of your project based on work categories and assign dollar estimates for each one.
- “Print Goal Request” which will allow you to download and save or print your Goal Request.
- “Copy Info Into New Goal” copies your Goal Request information into a new Goal Request.
- “Save and Submit” saves your Goal Worksheet and Work Category page and submits it to BECO.
- “Discard Unsaved Changes” erases any unsaved changes that occurred since the last time you saved.
- “Delete Goal” deletes the entire Goal Request permanently.

NOTE: You can complete the entire Goal Request in one sitting, or you can save and return to it later. You can also print draft Goal Requests at any time during this process. See Print Goal Worksheet for more information. Your drafts can also be returned to and picked up by any other Goal Requestor in your agency or group and can be submitted by them at any time. The individual that created the original request will remain the requestor unless the person submitting the goal replaces their name with the original requestor’s name. Additionally, if you’re Goal Request remains in “draft” status for 120 calendar days, the system will auto-delete it with two warning emails to you prior to doing so. Keep in mind, the timer to auto-delete will reset every time the draft goal is saved.

To continue the Goal Worksheet, complete the Federal Aid Number, Project County, Total Contract Estimate, Federal Funding %, and all other information. All sections are required and must be provided to submit the Goal Request, with the exception of the secondary contact information. **LPA CA Agency Goal Requestors, however, are required to list the DBE Compliance Officer as the secondary contact. If that information is not listed, the goal will be returned by BECO.**

- The secondary contact section is provided as a convenience to allow you to copy someone else on the system generated communications for your Goal Request. The secondary contact will only be copied on system generated communications for that specific project Goal Request and not for all of your submitted Goal Requests.

OK Cancel

Work Categories

Once the Goal Worksheet has been completed, go to the Work Categories page by clicking on the dropdown next to the save button within the Goal Worksheet.

On the Work Categories Page, the dollar amount estimates for each work category on the project must be listed. As you fill out the page, keep in mind that the sum of the dollar amounts for all of the listed work categories should equal the Total Contract Estimate provided on the Goal Worksheet. The calculator at the top of the Work Category Page will assist you by showing the Total Contract Estimate from the Goal Worksheet and total all of the work category dollar amounts as you add them to the page.

A screenshot of the ADOT DBE & OJT Contract Goal Setting Application. The header includes the ADOT logo and navigation links: 'Home', 'Print Blank Goal', 'Create A New Goal', and 'Help'. The main heading is 'Planning/Engineering Design/Other Prof Services Work Categories'. Below this, there is a summary section with 'Total Contract Estimate: \$50,000' and 'Added Work Categories Total: \$15,000'. A blue arrow points to the 'Save' button next to the total. Below the summary, there is a section titled 'Original Work Categories'.

There are three work category sections:

- Original Work Categories
- Additional Work Categories
- New Work Categories
 - New Work Categories are limited to four categories and cannot represent more than 10% of the Total Contract Estimate. This is because the work category list is comprehensive and you should be able to find an existing category to use. If you feel the need to use a New Work category contact the BECO office for assistance. BECO's contact information is provided in the Main Menu under the "Help" dropdown.

Once you complete the Work Categories, save and return to the Goal Worksheet by using the dropdown next to the Save button and clicking "Go to goal page".

Now that the required information is complete on both the Goal Worksheet and the Work Category Page, and the dollar amount of the Work Categories equals the Total Contract Estimate, your Goal Request can be submitted. To submit your Goal Request, click on “Save and Submit” within the dropdown menu next to the Save button on the Goal Worksheet page.

Once submitted, the Goal Request will change from “draft” status to “submitted” status and you and the secondary contact, if one is provided, will receive an email confirming that you have successfully submitted your Goal Request. An email will also be sent to the BECO office indicating that your Goal Request was successfully submitted and is ready for review.

NOTE: Once a Goal Request is submitted, another Goal Request with the same project number cannot be submitted again if a Goal Request is associated with it in the “submitted” status. A second Goal Request for the same project number can only be submitted if the original Goal Request for that project number is either in “returned” or “expired” status.

Print a Submitted Goal Request

After you submit your Goal Request, you may re-enter it at any time from your dashboard. The Goal Worksheet and Work Categories page will be “Read-Only”. You do, however, have the option to print and/or save your goal request for your records.

Scope Of Work Description Description

Goal Request Approved

After your goal request is submitted, BECO has ten (10) business days to review your Goal Request, if all the appropriate information is provided. When your Goal Request is approved by BECO, you will receive an email indicating the goal assessed and the expiration date, in addition to other helpful information. You will receive two more emails as the expiration date comes closer, as a reminder of the upcoming expiration date. You will also receive a final email once the goal has expired.

Resubmit a Returned Goal Request

When a Goal Request is returned, you will receive an email with the returned reason. Once you receive the notification email that your Goal Request was returned, you can re-enter the system and find the previously submitted Goal Request. Your Goal Request will be in the in “Returned” status on your dashboard. Enter the Goal Request, make any required changes and then save and resubmit it. Once you resubmit the returned Goal Request, the status will change to “resubmitted”.

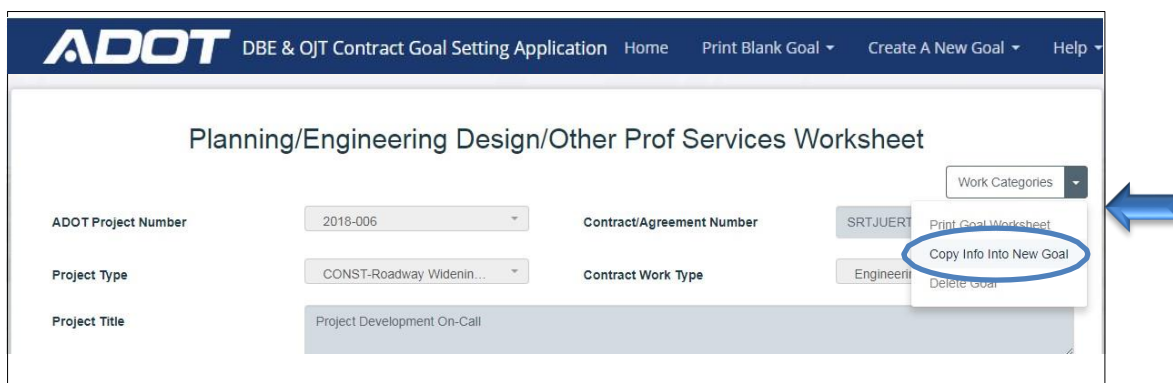

NOTE: The resubmit option is only available on Goal Requests that are returned by BECO staff. The system will allow for the rejection process to occur as many times as necessary.

Resubmit an Expired Goal Request

A submitted approved goal expires 120 calendar days after submission, with the status reading “expired”. If the goal expires and the project is not advertised prior to the goal expiration date, you can re-enter the system and submit a second goal request. To do this, find the original Goal Request and copy it into a new Goal Request by using the [Copy Info Into New Goal](#) feature.

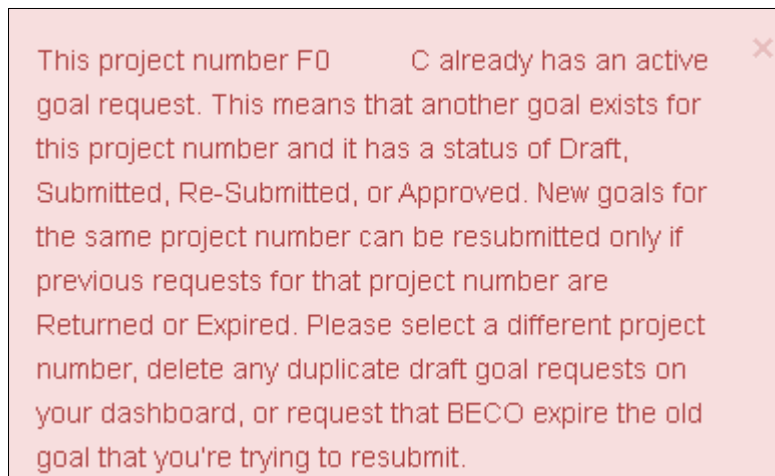

Copy a Previously Submitted Goal Into a New Goal

To copy a previously submitted Goal Request into a new goal, return to the Goal Request that you would like to copy from and select “Copy Info Into New Goal” from the dropdown on the top right corner next to Work Categories. Make sure your previous goal has been Returned or Expired.

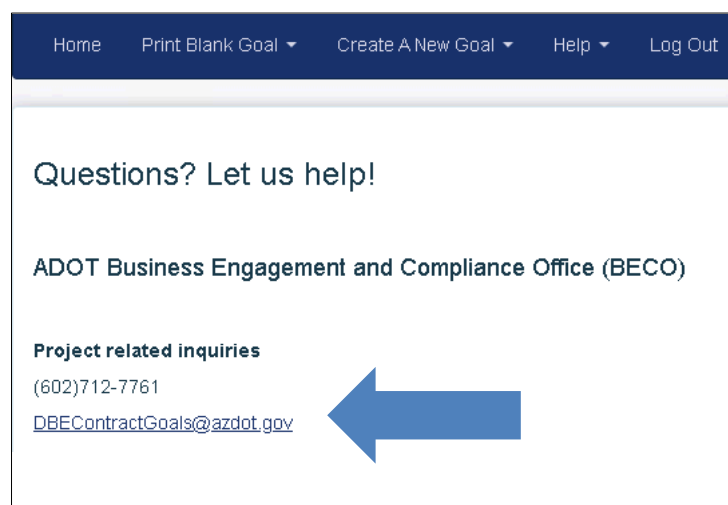

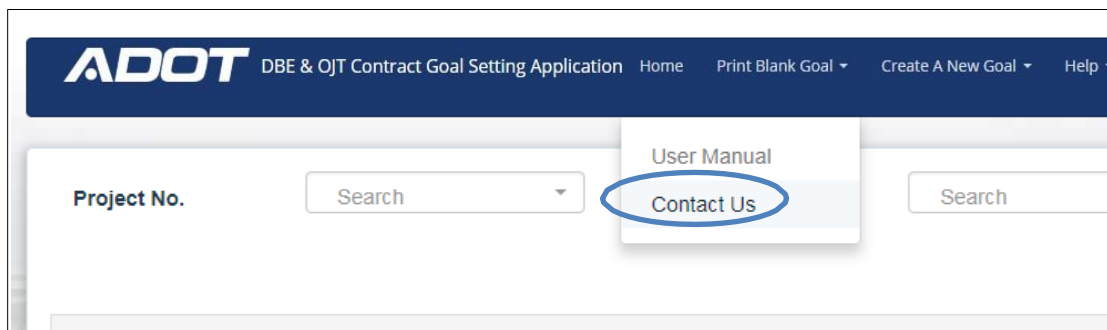

(cont.)

If your previous goal isn't Returned or Expired you will receive the following message and will not be able to save and submit your goal.

Request to Expire a Goal

To request to expire a goal prior to the expiration date, call or email the BECO office and provide the project number. Click on "Help" on the Main Menu and select "Contact Us" and BECO's Contact information will display. The "Questions? Let us help!" screen will display and there will be a link provided under "Project related inquiries" that can be clicked on (DBEContractGoals@azdot.gov – 2nd screenshot below) and a new email message will generate to assist you with sending your request.

Request to Add a New Project Number

If the Project Number that you would like to submit a Goal Request for is not found in the project list and a draft for the Project has not been started, you should request to have the Project Number added by beginning to type in the project number section and selecting “Add ADOT Project/TRACS No.” from the dropdown menu.

ADOT Project Number

Project Type

Select ADOT Project/TRAC...

Test 1234

Add ADOT Project/TRACS No.

When you see the Project Request window, provide the project number and description and click “Submit”.

Project Number Request

Before submitting a project number request, work with your ADOT project manager or ADOT program manager to ensure that the ADOT Project /TRACS number is not already listed.

Any project number requests will be evaluated and confirmed by the ADOT project manager or program manager before being added to this list. The completion of your request may take up to three business days to allow for the required auditing process.
