Issue Date 9-23-2009

To: All Bridge Designers

From: Jean A. Nehme, Ph.D., P.E.
State Bridge Engineer

Subject: Structure Detail Drawing SD 2.04

Web Site: <http://www.azdot.gov/Highways/bridge/DetailDwg/Approaches.asp>

Please note that the following Slope Paving Details sheet has been updated:

1. SD 2.04; the following modifications were made:
 - a. Updated to Underpass and Overpass: Details, notes and revised title block updated to include slope paving for both underpass and overpass locations. Structure Detail Drawing SD 2.05 is deleted (no longer needed).
 - b. Revised Details: Details show slope paving at abutments above embankment fills.
 - c. Added Note: Note added for slope paving at abutments located within cut sections.
 - d. Revised Toe Depth: Depth of slope paving toe increased to 1'-6.
 - e. Revised WWR Size: Size of welded wire reinforcing increased to 6 x 6 - W2.5 x W2.5 and welded wire reinforcing specification ASTM A185 added.
 - f. Revised Divider Spacing: Redwood divider spacing revised to maximum 8 feet vertical and maximum 15 feet horizontal.
