

ALTERNATIVE FUEL WITHDRAWAL

Vehicle Identification Number	Year	Make	License Plate
-------------------------------	------	------	---------------

I certify that the vehicle above was registered as an alternative fuel vehicle and that I have removed the vehicle's alternative fuel storage tanks and placards. I agree to pay the full vehicle license tax and registration fees for the current registration year, due for a non-alternative fuel vehicle. I agree to defend, hold harmless and indemnify the Arizona Department of Transportation and the Arizona Department of Environmental Quality, and any of its officers, employees, agents or contractors, from all actions brought or damages alleged by reason of these decisions on my part.

Owner Name (first, middle, last, suffix)	Signature		
Mailing Address	City	State	Zip

Acknowledged before me this date.	Notary or MVD Agent Signature		
Date	County	State	Commission Expires

Requirements

Once the alternative fuel storage tanks/cylinders and placards have been completely removed, you must visit an MVD or authorized third party office to remove the alternative fuel designation and re-register as a gasoline powered vehicle. You must submit the following:

- This form, properly notarized, or witnessed by an MVD agent
- The alternative fuel plates (or a pay a \$5.00 lost plate fee)
- Proof of compliance with emissions testing requirements (A Restricted Use 3-Day Permit can be purchased online at AZMVDNow.gov to lawfully operate the vehicle for emissions testing purposes). See below for additional emissions testing information.

Any remaining allowable fees will be credited and a new registration document and license plate will be issued for the gasoline powered vehicle.

Additional Emissions Testing Information

Please note that model 1996 and newer light duty vehicles will receive an On-Board Diagnostic inspection instead of the tailpipe emissions inspection that the alternative fuel vehicle received. It is suggested that you have the On-Board Diagnostic system checked, prior to taking the vehicle for an emissions inspection, to insure that it is operating properly.

For technical assistance, please call the Arizona Department of Environmental Quality at 602.771.3954.
