ADOT considering two additional interchanges for South Mountain Freeway

Two open houses scheduled in May regarding 32nd Street, Ivanhoe Street

May 02, 2018

PHOENIX – Based on community input since the start of construction, the Arizona Department of Transportation is considering two additional interchanges for the Loop 202 South Mountain Freeway.

Two open houses are scheduled this month as part of the environmental study process on possible interchanges at 32nd Street in Ahwatukee and at Ivanhoe Street, located between the Ahwatukee and Laveen areas

Community members can view renderings and provide feedback by completing a questionnaire in person. Staff from Connect 202 Partners, the developer of the South Mountain Freeway, will answer questions regarding construction updates on Pecos and Center segments of the freeway:

- 32nd Street Traffic Interchange Study/Pecos Segment Construction Update Open House:** Tuesday, May 22, Desert Vista High School, Cafeteria, 16440 S. 32nd St., Phoenix
- Ivanhoe Street Traffic Interchange Study/Center Segment Construction Update Open House:** Wednesday, May 30, Laveen Elementary School District Office, Building A, 5001 W. Dobbins Road, Phoenix

Both open houses are scheduled from 6-8 p.m. There is no formal presentation. The public can speak one-on-one with project staff about the studies and learn more about construction progress to date and what to expect for the rest of the year.

Those unable to attend the open houses can provide feedback through June 4 via channels including:

- Online: SouthMountainFreeway.com (click on the 32nd Street and Ivanhoe Street questionnaires or visit 32ndStreetStudy.com and IvanhoeStreetStudy.com)
- Email: SMFInterchangeStudy@hdrinc.com
- Phone: 1.833.310.2470
- Mail: c/o ADOT Communications, 101 N. First Ave., St. 1950, Phoenix, AZ 85003-19234

The latest project information is available via the project website at SouthMountainFreeway.com, email and text updates (click "Subscribe for Updates" on the project website), and the project hotline numbers (1.855.763.5202, or para Español, 623.239.4558).

The 22-mile freeway, expected to open by late 2019, will provide a long-planned direct link between the East Valley and West Valley and a much-needed alternative to Interstate 10 through downtown Phoenix. Approved by Maricopa County voters in 1985 and again in 2004 as part of a comprehensive regional transportation plan, the South Mountain Freeway will complete the Loop 202 and Loop 101 freeway system in the Valley.

For more information, visit SouthMountainFreeway.com.

News Releases

South Mountain Freeway open house May 30 on potential Ivanhoe Street interchange

Attendees also can get construction updates from freeway developer

May 24, 2018

PHOENIX – An open house Wednesday, May 30, in Laveen will allow attendees to view renderings and provide feedback on an Ivanhoe Street traffic interchange the Arizona Department of Transportation is considering for the Loop 202 South Mountain Freeway.

ADOT and project representatives will be available from 6 to 8 p.m. at the Laveen Elementary School District Office, Building A, 5001 W. Dobbins Road, Phoenix.

While there will be no formal presentation, attendees will be able to speak individually with project staff about the Ivanhoe Street interchange environmental study, which began in February. They also can complete a questionnaire.

In addition, representatives of Connect 202 Partners, the developer building the freeway, will be available to answer construction-related questions on Center segment construction occurring between 51st Avenue and 32nd Lane.

For those unable to attend, there are still plenty of ways to provide feedback through July 19, including:

- Online: SouthMountainFreeway.com (click on the Ivanhoe Street questionnaire or visit IvanhoeStreetStudy.com)
- Email: SMFInterchangeStudy@hdrinc.com
- Phone: 1.833.310.2470
- Mail: c/o ADOT Communications, 101 N. First Ave., St. 1950, Phoenix, AZ 85003-19234

The latest project information is available via the project website at SouthMountainFreeway.com, email and text updates (click "Subscribe for Updates" on the project website), and the project hotline numbers (1.855.763.5202, or para Español, 623.239.4558).

The 22-mile freeway, expected to open by late 2019, will provide a long-planned direct link between the East Valley and West Valley and a much-needed alternative to Interstate 10 through downtown Phoenix. Approved by Maricopa County voters in 1985 and again in 2004 as part of a comprehensive regional transportation plan, the South Mountain Freeway will complete the Loop 202 and Loop 101 freeway system in the Valley.

IVANHOE STREET TRAFFIC INTERCHANGE STUDY

Provide Your Input Now Through June 4

Loop 202
South Mountain
Freeway

Loop 202 South Mountain Freeway

Like This Page · May 2 ·

In 2018, the Arizona Department of Transportation (ADOT) began an environmental study to potentially realign Ivanhoe Street (located southeast of 51st Ave and Estrella Dr) and include ramps to the future Loop 202 South Mountain Freeway to address access and traffic concerns. As part of the environmental study, ADOT began an environmental re-evaluation to determine the feasibility and analyze any changes in environment and social impacts of adding an interchange. Additionally, ADOT is seeking public input on the interchange.

Visit www.southmountainfreeway.com and complete the online questionnaire to provide your input on the potential interchange.

All comments must be submitted by June 4, 2018 to be included in the study record and considered in the decision to build the interchange.

Subject: ADOT - Loop 202 South Mountain Freeway - New Traffic Interchange Under Consideration at Ivanhoe Street

Dear resident,

The Arizona Department of Transportation (ADOT) invites you to participate in a brief questionnaire regarding the environmental study of a proposed new traffic interchange (TI) at Ivanhoe Street (located southeast of 51st Avenue and Estrella Drive in Maricopa County) and the Loop 202 South Mountain Freeway. Your input, along with potential environmental impacts (natural and human environment), will be included in the environmental study record used to make a decision on whether the Ivanhoe Street TI is built.

There will also be an opportunity for community members to complete this questionnaire in-person at the Center Segment Construction Update and Ivanhoe Street TI Open House from 6 to 8 p.m. on Wednesday, May 30, at the Laveen Elementary School District Office, Building A, 5001 W. Dobbins Road, Laveen, 85339. There is no formal presentation; however you can speak to members of the project team about the Ivanhoe Street and Loop 202 South Mountain Freeway study. Additionally, you can speak with team members from Connect 202 Partners about the Center Segment construction progress to date and what to expect for the rest of this year.

If you are not able to provide input online, you can send an email to SMFinterchangestudy@hdrinc.com, call the project line at (833) 310-2470 or mail comments to c/o ADOT Communications, [REDACTED], Phoenix, AZ 85003-1923.

The public comment deadline is **June 4, 2018**.

Subject: ADOT - Loop 202 South Mountain Freeway - Ivanhoe Street Traffic Interchange Questionnaire and Open House Notice

Good morning,

My name is Marsha Miller and I am the public outreach communications manager working on behalf of the ADOT South Mountain Freeway team. We have opened the public comment period for the environmental study of a proposed traffic interchange at Ivanhoe Street and the Loop 202 South Mountain Freeway. The community can provide input by completing a questionnaire, sending us an email, calling the project line, commenting by mail, or attending the public open house on May 30.

We would greatly appreciate your assistance in sharing the below email with your parents, families, faculty, and staff. Please feel free to add any introduction language. Also, would you please let us know when you send the email out so we can keep track of it in our study record? Thank you!

Email Subject Line: PLEASE READ! Loop 202 South Mountain Freeway - Ivanhoe Street Traffic Interchange Questionnaire and Open House

Dear Parents and Families, Faculty and Staff,

The Arizona Department of Transportation (ADOT) invites you to participate in a brief questionnaire regarding the environmental study of a proposed new traffic interchange (TI) at Ivanhoe Street (located southeast of 51st Avenue and Estrella Drive in Maricopa County) and the Loop 202 South Mountain Freeway. Your input, along with potential environmental impacts (natural and human environment), will be included in the environmental study record used to make a decision on whether the Ivanhoe Street TI is built.

There will also be an opportunity for community members to complete this questionnaire in-person at the Center Segment Construction Update and Ivanhoe Street TI Open House from 6 to 8 p.m. on Wednesday, May 30, at the Laveen Elementary School District Office, Building A, 5001 W. Dobbins Road, Laveen, 85339. There is no formal presentation; however you can speak to members of the project team about the Ivanhoe Street and Loop 202 South Mountain Freeway study. ADOT Loop 202 South Mountain Freeway Project Team

Center Segment Project Update

Center Segment Construction

The South Mountain Freeway developer, Connect 202 Partners (C202P), is moving forward to construct the final segment of the Loop 202 South Mountain Freeway, known as the "Center Segment." The 3-mile-long segment includes five multi-use crossings and multiple drainage structures. Plant salvage, assessment of soil conditions and groundwater depths, building access roads and earthwork are underway. In early April, C202P began controlled rock blasting along the two southwestern ridges of South Mountain.

Construction Updates

Periodic traffic restrictions are anticipated on 51st Avenue, Dusty Lane and Ivanhoe Street during construction. You will continue to receive construction updates from the C202P team as work progresses in your area.

Looking for weekly construction and traffic updates? Sign up for the Weekly Traffic Alert and receive email and/or text messages outlining the upcoming traffic alerts, detours and closures affecting travelers near freeway construction areas. Visit the project website to sign up.

Proposed Ivanhoe Street Traffic Interchange

In 2018, the Arizona Department of Transportation (ADOT) began an environmental study to potentially realign Ivanhoe Street and include ramps to the future Loop 202 South Mountain Freeway to address access and traffic concerns. The study of this interchange has also been supported by the Maricopa County Department of Transportation and the Maricopa Association of Governments. The renderings below show the original design concept and proposed design concept of an Ivanhoe Street interchange.

As part of the environmental study, ADOT requested C202P to draft preliminary design plans to determine the feasibility of adding an interchange without acquiring additional properties. Also, ADOT began an environmental re-evaluation to determine the feasibility and analyze any changes in environment and social impacts of adding an interchange. Additionally, ADOT is seeking public input on the interchange.

Ivanhoe Street - Original Design Concept

Ivanhoe Street - Proposed Interchange Concept

Study Updates and Open House

On May 30, the project team will host an open house to discuss the considered interchange in-person as well as answer questions about construction. Providing your contact information via email, phone or direct mail will allow our team to notify you when there are study updates.

SMFinterchangestudy@hdrinc.com

833-310-2470

c/o ADOT Communications
101 N. 1st Avenue, Suite 1950
Phoenix, AZ 85003-1923

1. What is the purpose and need of the traffic interchange?

The Ivanhoe Street interchange would provide access to local residents and the Gila River Indian Community (Community).

2. Why does ADOT require another environmental study for a possible addition of an Ivanhoe Street traffic interchange?

The traffic interchange was not included in the Final Environmental Impact Statement/Record of Decision (FEIS/ROD); its inclusion at this point constitutes a change in scope that must be cleared by the Federal Highway Administration (FHWA) through the completion of an environmental review process.

3. Would ADOT need to acquire additional right-of-way to add the interchange?

Adding on- and off-ramps would not result in the need to acquire additional right-of-way.

4. What are the projected traffic volumes at the Ivanhoe Street interchange?

Based on traffic projections obtained from the Maricopa Association of Governments for the year 2040, approximately 2,000 vehicles per day would use each of the on- and off-ramps at Ivanhoe Street. The freeway is projected to carry 117,000 vehicles per day in 2040.

5. Would an interchange at Ivanhoe Street provide access to the casino?

If approved, the Community would be responsible for building a road connecting Ivanhoe Street west of the interchange to Komatke Lane.

6. Would an interchange at Ivanhoe Street affect access to Dusty Lane?

Access to Dusty Lane will be maintained via Ivanhoe Street and 45th Avenue in both the current and proposed design concepts.

7. What does the environmental study consider? How long will it take to complete?

The environmental study will consider all of the elements considered in the FEIS/ROD, which include potential impacts the project would have on the physical, natural and human environment. It's anticipated the study, which began in February 2018, will be completed in August (approximately six months). FHWA and ADOT will evaluate the environmental re-evaluation and public feedback received and determine the outcome in August 2018.

8. If approved, when would the Ivanhoe Street interchange be constructed?

If approved, the traffic interchange could be constructed in conjunction with the Center Segment freeway construction, and will not delay the opening of the South Mountain Freeway in late 2019.

9. How can constituents provide input?

Members of the public may submit their input by filling out the questionnaire online at www.IvanhoeStreetStudy.com, returning the questionnaire included in this packet, sending an email to SMFinterchangestudy@hdrinc.com, or calling the project line at 833-310-2470. **All comments must be submitted by June 4, 2018 to be included in the Study record and considered in the decision.**

What Do You Think?

Help us better understand your thoughts regarding the proposed interchange by providing your feedback. To ensure information is accurately captured, please limit responses to one per household.

Comments submitted by June 4, 2018 will be included in the Study record.

Submit your questionnaire by mail using the provided return envelope.

How many drivers in your household utilize Ivanhoe Street? _____

What is the proximity of your property to Ivanhoe Street?

- ☐ My property is directly adjacent to the freeway
- ☐ I'm a few hundred feet away
- ☐ I don't live in the Dusty Lane area

What concerns do you have about the proposed interchange at Ivanhoe Street?

Do you believe the area would benefit from an interchange at Ivanhoe Street?

- ☐ Yes (please explain): _____
- ☐ No (please explain): _____
- ☐ Unknown

Name: _____

Email: _____

Would you like to receive project updates?

☐ Yes ☐ No

Thank You

Your participation in this questionnaire is appreciated and will help ADOT and FHWA during the decision-making process.

If you have additional questions or comments about the Ivanhoe Street Interchange Study, please contact our team by email, phone or direct mail.

If you have additional questions or comments about the Ivanhoe Street Interchange Study, please contact our team by email, phone or direct mail.

South Mountain Freeway

Información del proyecto del segmento centro

Construcción del segmento Centro

El constructor de la Carretera South Mountain, Connect 202 Partners (C202P por sus siglas en inglés), está avanzando hacia la construcción del último segmento del Periférico 202 de la Carretera South Mountain conocido como el “segmento Centro.” Este segmento de 3 millas de largo incluye cinco cruces de usos múltiples y varias estructuras para drenajes. Está en proceso el salvamento de plantas, la evaluación de las condiciones del suelo y profundidad del agua, la construcción de caminos de acceso y la perforación del suelo. A principios de abril, C202P inició la explosión controlada de roca en los dos cerros del suroeste de South Mountain.

Información actualizada de la construcción

Durante la construcción se esperan restricciones de tráfico en la avenida 51, Dusty Lane y la calle Ivanhoe. Usted continuará recibiendo información actualizada por parte de C202P a medida que el trabajo avance en su área.

¿Está buscando información semanal actualizada sobre la construcción y tráfico? Inscríbese para recibir avisos de tráfico y reciba correos electrónicos y/o mensajes de texto detallando las próximas alertas de tráfico, desviaciones y cierres que afectarán a los viajeros cerca de las áreas de construcción del Periférico. Ingrese en la página del proyecto para inscribirse.

Intercambio de tráfico propuesto en la calle Ivanhoe

En 2018, el Departamento de Transporte de Arizona (ADOT) inició un estudio ambiental para posiblemente reestructurar la calle Ivanhoe e incluir las rampas para el futuro Periférico 202 de la Carretera South Mountain y así tratar las preocupaciones de acceso y tráfico. El estudio de este intercambio de tráfico ha recibido también el apoyo por parte del Departamento de Transporte de Maricopa y la Asociación de Gobiernos de Maricopa. En la parte de abajo se muestra el concepto del diseño original y el diseño que se está considerando del intercambio en la calle Ivanhoe.

Como parte del estudio ambiental, ADOT solicitó a C202P que realizara un diseño preliminar para determinar la posibilidad de agregar un intercambio sin adquirir propiedades adicionales. Además, ADOT inició un nuevo estudio ambiental para determinar si esto era viable, analizar cualquier cambio ambiental y los impactos sociales que se tendrían al agregar un intercambio. Además, ADOT está solicitando comentarios del público en general sobre el intercambio considerado.

Calle Ivanhoe – Concepto del Diseño Original

Calle Ivanhoe – Concepto Propuesto del Intercambio

Actualizaciones del estudio y Reunión pública

El 30 de mayo, el equipo encargado del proyecto llevará a cabo una reunión pública para hablar sobre el intercambio propuesto y responder a las preguntas sobre la construcción. Al proporcionar su información de contacto a través de correo electrónico, teléfono o correo postal permitirá que nuestro equipo le notifique cuando haya información actualizada del estudio.

SMFinterchangestudy@hdrinc.com

833-310-2470

c/o ADOT Communications
101 N. 1st Avenue, Suite 1950
Phoenix, AZ 85003-1923

1. ¿Cuál es el propósito y la necesidad de construir un intercambio de tráfico?

El intercambio de tráfico en la calle Ivanhoe facilitaría el acceso a residentes locales y de la Comunidad Indígena de Gila River (la Comunidad).

2. ¿Por qué necesita ADOT hacer otro estudio ambiental debido a la posible construcción de un intercambio de tráfico en la calle Ivanhoe?

El intercambio de tráfico no fue incluido en el Reporte Final del Impacto Ambiental/ Registro de la Decisión (FEIS/ROD); su inclusión en este momento significa un cambio en el estudio por lo que debe ser autorizado por la Administración Federal de Carreteras (FHWA) al terminarse el proceso de la revisión ambiental.

3. ¿Necesita ADOT adquirir propiedades adicionales para agregar el intercambio?

No se necesitará adquirir más propiedades para agregar rampas de entrada y salida.

4. ¿Si se construyera el intercambio en la calle Ivanhoe, cuál es el volumen de tráfico proyectado?

Basado en las proyecciones de tráfico obtenidas por la Asociación de Gobiernos de Maricopa para el año 2040, aproximadamente 2,000 vehículos por día usarían cada una de las rampas de entrada y salida en la calle Ivanhoe. Se proyecta que la carretera tenga un tráfico de 117,000 vehículos por día en el 2040.

5. ¿Cómo proporcionará el acceso al casino el intercambio en la calle Ivanhoe?

Si el intercambio es aprobado, la Comunidad sería responsable de construir un camino que conecte la calle Ivanhoe al oeste del intercambio con Komatke Lane.

6. ¿Un intercambio en la calle Ivanhoe afectaría el acceso a Dusty Lane?

El acceso a Dusty Lane se mantendrá a través de la calle Ivanhoe y avenida 45th tanto en el diseño actual como en el propuesto concepto.

7. ¿Qué es lo que se considerará en el estudio? ¿Cuánto tiempo tomará para completarse?

El estudio ambiental tomará en cuenta todos los elementos considerados en el FEIS/ROD, el cual incluye los impactos potenciales que el proyecto tendrá en las áreas física, natural y humana. Se anticipa que el estudio, el cual inició en febrero 2018, sea completado en agosto (aproximadamente seis meses). FHWA y ADOT evaluarán el nuevo estudio ambiental y los comentarios del público recibidos para determinar el resultado en agosto de 2018.

8. ¿Y si es aprobado, cuándo se iniciaría la construcción del intercambio de tráfico en la calle Ivanhoe?

Si es aprobado, el intercambio de tráfico pudiera construirse junto con la construcción del segmento Centro de la carretera, y no retrasaría la apertura de la Carretera South Mountain para finales de 2019.

9. ¿Cómo pueden entregar sus comentarios los electores?

El público puede enviar sus comentarios completando un cuestionario en línea en www.IvanhoeStreetStudy.com o llenando la copia que se incluye en este paquete, enviando un correo electrónico a SMFinterchangestudy@hdrinc.com o llamando al 833-310-2470. **Todos los comentarios deben entregarse antes del 4 de junio de 2018 para que sean incluidos en el récord del proyecto y considerados en la decisión.**

¿Qué Piensa Usted?

Ayúdenos a entender lo que piensa con respecto al intercambio de tráfico propuesto proporcionándonos sus comentarios. Para asegurar que la información se capture correctamente, por favor solamente someta in cuestionario por familia.

Para que sus preguntas o comentarios sean incluidos en los registros del estudio, por favor envíelos antes del 4 de junio de 2018.

Envíe su cuestionario por correo utilizando el sobre que se adjunta.

¿Cuántos conductores en su hogar utilizan la calle Ivanhoe?: _____

¿Qué tan cerca se encuentra su propiedad de la calle Ivanhoe?

- ☐ Mi propiedad está directamente junto a la carretera
- ☐ Está a unos cuantos pies de la carretera
- ☐ No vivo en el área de Dusty Lane

¿Qué le preocupa del intercambio de tráfico propuesto para la calle Ivanhoe?

¿Cree usted que la comunidad se beneficiaría de una intersección en la calle Ivanhoe?

- ☐ Sí (Por favor explique): _____
- ☐ No (Por favor explique): _____
- ☐ No sabe

Nombre: _____ **correo electrónico:** _____

¿Le gustaría recibir información actualizada del Proyecto? ☐ Sí ☐ No

Muchas Gracias

Su participación en esta cuestionario es apreciada y ayudará a ADOT y a la FHWA durante el proceso de la toma de decisiones.

Si tiene más preguntas o comentarios sobre el estudio del intercambio de tráfico de la calle Ivanhoe, por favor comuníquese con nuestro equipo por correo electrónico, teléfono o correo postal.
